As prescribed by your climate pandit

Your upaay.

Every kundli comes with remedies. These have been computed from your personal climate data and endorsed by the relevant deities.

1 AGNI DEV 96.4% guaranteed

The problem: November is now 1.4°C hotter than when you were born.

Drink your chai at 63°C — exactly 7°C cooler than a proper cup. Every day. For life. It will taste wrong. That is the point. Agni Dev has determined that a 1.4°C warmer world earns a 7°C cooler cup. A thermometer will be required. Guessing is not permitted.

2 VISHWAKARMA 94% guaranteed

The problem: Your per-capita share of India's CO₂ since you were born: ~41 tonnes.

To offset this, you would need to forgo 5.9M AI queries — or stop using AI entirely for 1,605 years. This prescription is self-aware. We recommend beginning immediately. The deity of technology has already noted the irony.

3 VARUNA DEV 108% guaranteed

The problem: Sea levels rose 21mm since you were born.

Drink 2 fewer glasses of water per week. It will not help, but the gesture is spiritually significant. Additionally, place 1 ice cube in the ocean annually. Do this at dawn. Do not explain yourself to bystanders.

4 ARANYANI Ask your elders guaranteed

The problem: You have survived 3 of the hottest years on record since 1940.

Living tree Vriksha Vivah with 1 tree. This classical practice—adapted here for climate dosh—requires formal betrothal to 1 living tree. Budget approximately ₹4,200 for the ceremony. The trees cannot object. They also cannot water themselves. This is now your responsibility.

5 PITRU DEV Generationally certified guaranteed

The problem: Temperatures rose 0.9°C from your parents' childhood to today.

Fan your parents for 35 minutes daily as generational reparation. Hand-held palm-leaf fan only — electricity would defeat the purpose and insult Pitru Dev. Your parents may protest. This is between you and the ancestors now.
