

How does your childhood compare to the climate of today?

Bengaluru got hotter while you grew up.

An average November is now 1.4°C warmer than during 1985–1989.

Your climate trail

Temperature, year by year, where you lived.

39 years from 1987 to 2025. Each dot is the mean temperature for that calendar year.

Your orbit

Bengaluru (Bangalore), year by year.

A line chart wrapped round — each point is one year, distance from centre is how much it rained.

Radial line · 1987–2025 clockwise from top · radius = annual rainfall

Rain

Your monsoon rhythm shifted.

June–September rainfall at Bengaluru is about 30% wetter now than during 1985–1989.

Rainfall memory

Wet and dry years in Bengaluru (Bangalore).

You lived through 39 rainy seasons there since 1987. 49% of those years were wetter than your own median — your soggiest was 2021 (1,441 mm), your driest 2003.

590–1,441 mm scale across your cities

Legend: ● Drier years ● Wetter years Each band = one year · thicker = more rain · rings share one shape (no crossing)

Organic rings (noise-shaped, like a tree cross-section) · 1987–2025 · era5

You've lived through 8 record-hot years.

Top 10 at each home since 1940 · taller shading = hotter peak

Other India peaks use ERA5 grid cells (~25 km) until station history is loaded.

India's carbon emissions across your lifetime

National CO₂ emissions from 1987 to 2024 by fuel and industry source. In your birth year (1987), India emitted 455.4 Mt of CO₂, which has since grown to 3,193.5 Mt today (7× higher).

In 2024, when you were age 37, global CO₂ was 424 ppm. India emitted 3,193.5 Mt of CO₂. This is 7.0× the emissions level of your birth year (455.4 Mt, when global CO₂ was 349.3 ppm; today it is 427.4 ppm).

Interpretation: The diamond shapes your timeline from birth (bottom matchstick head) to today (top vertex). The organic stacked plume represents CO₂ emissions contributions by source: Coal, Oil, Cement, Gas, and Flaring, which expand like smoke as emissions grow.

The melting north

The Arctic you were born into is gone.

SUMMER SEA ICE LOST SINCE YOU WERE BORN

Since you were born, Arctic summer sea ice covering **an area 76% the size of India** has melted away.

The September minimum shrank from 7.15 to 4.67 million km² (1985–1989 → 2021–2025) — a loss of about 2.49 million km².

+21 mm

Small numbers, compounding consequences.

As prescribed by your climate pandit

Your *upaay*.

Every kundli comes with remedies. These have been computed from your personal climate data and endorsed by the relevant deities.

1 AGNI DEV

96.4% guaranteed

The problem: November is now 1.4°C hotter than when you were born.

Drink your chai at 63°C — exactly 7°C cooler than a proper cup. Every day. For life. It will taste wrong. That is the point. Agni Dev has determined that a 1.4°C warmer world earns a 7°C cooler cup. A thermometer will be required. Guessing is not permitted.

2 VISHWAKARMA

100% guaranteed

The problem: Your per-capita share of India's CO₂ since you were born: ~41 tonnes.

To offset this, you would need to forgo 5.9M AI queries — or stop using AI entirely for 1,605 years. This prescription is self-aware. We recommend beginning immediately. The deity of technology has already noted the irony.

3 VARUNA DEV

108% guaranteed

The problem: Sea levels rose 21mm since you were born.

Drink 2 fewer glasses of water per week. It will not help, but the gesture is spiritually significant. Additionally, place 1 ice cube in the ocean annually. Do this at dawn. Do not explain yourself to bystanders.

4 ARANYANI

Ask your elders guaranteed

The problem: You have survived 8 of the hottest years on record since 1940.

Perform Vriksha Vivah with 3 trees. This classical practice—adapted here for climate dosh—requires formal betrothal to 3 living trees. Budget approximately ₹12,600 for the ceremonies. The trees cannot object. They also cannot water themselves. This is now your responsibility.

5 PITRU DEV

Generationally certified guaranteed

The problem: Temperatures rose 0.9°C from your parents' childhood to today.

Fan your parents for 35 minutes daily as generational reparation. Hand-held palm-leaf fan only — electricity would defeat the purpose and insult Pitru Dev. Your parents may protest. This is between you and the ancestors now.

* These remedies are satirical and scientifically non-binding. Your actual carbon footprint requires less theatrical and more structural intervention.
