

How does your childhood compare to the climate of today?

Jhārkhand bucked the trend.

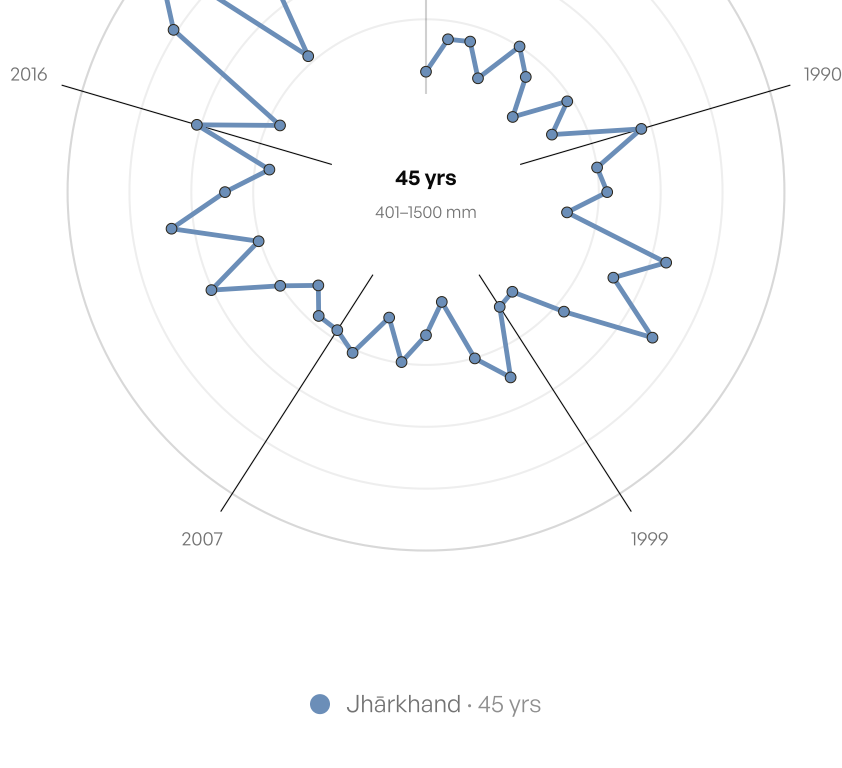

An average October now runs 1.8°C cooler than during 1979–1983.

Your orbit

Jhārkhand, year by year.

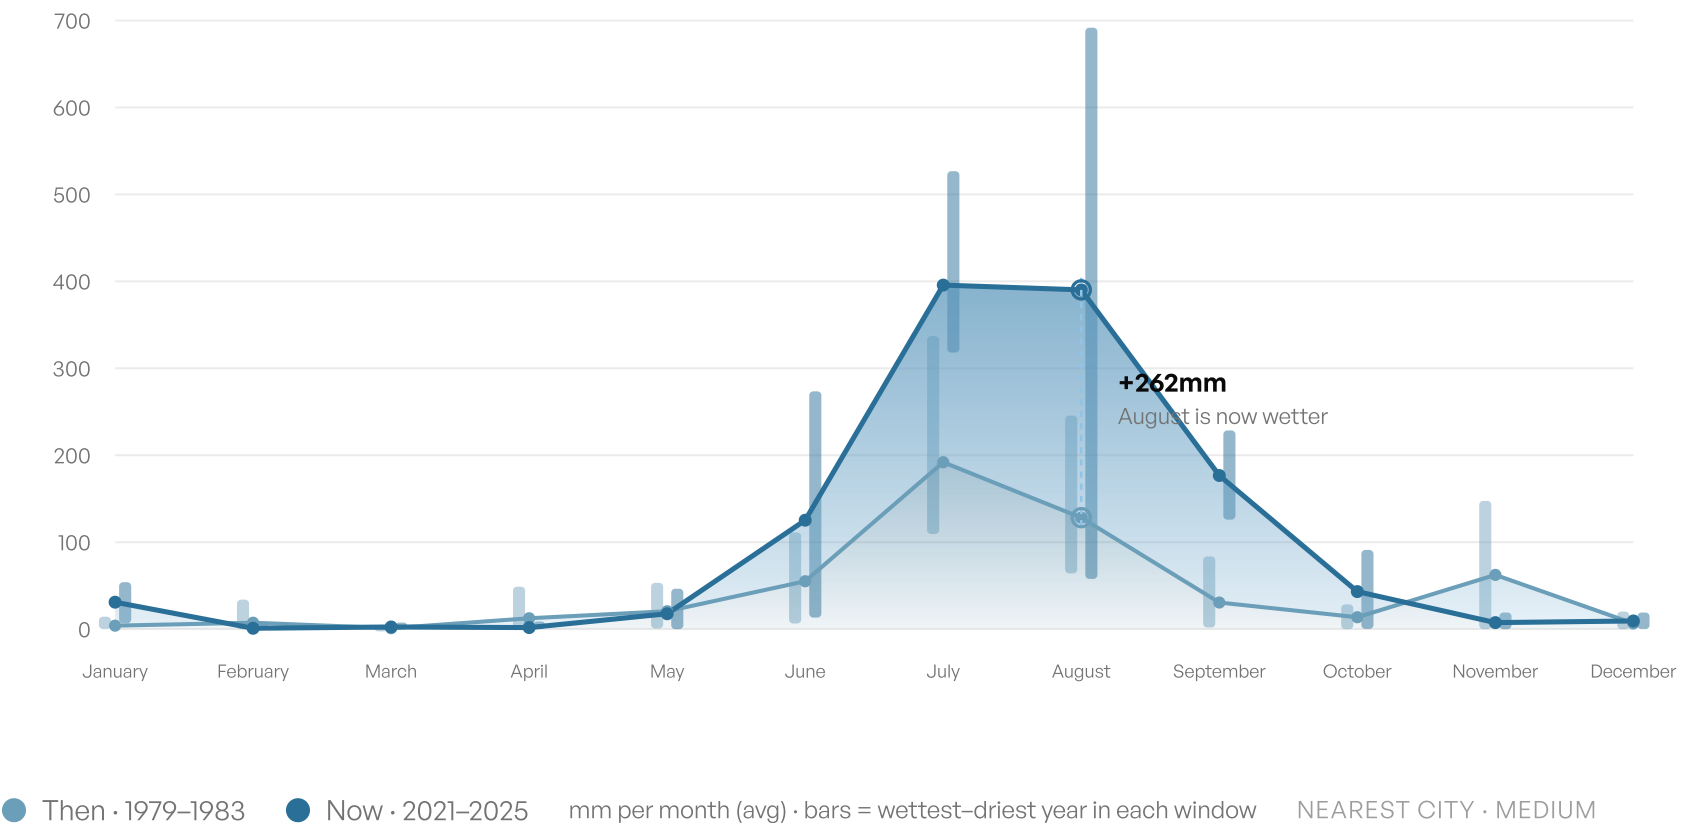

A line chart wrapped round — each point is one year, distance from centre is how much it rained.

Rain

Downpours are stacking up.

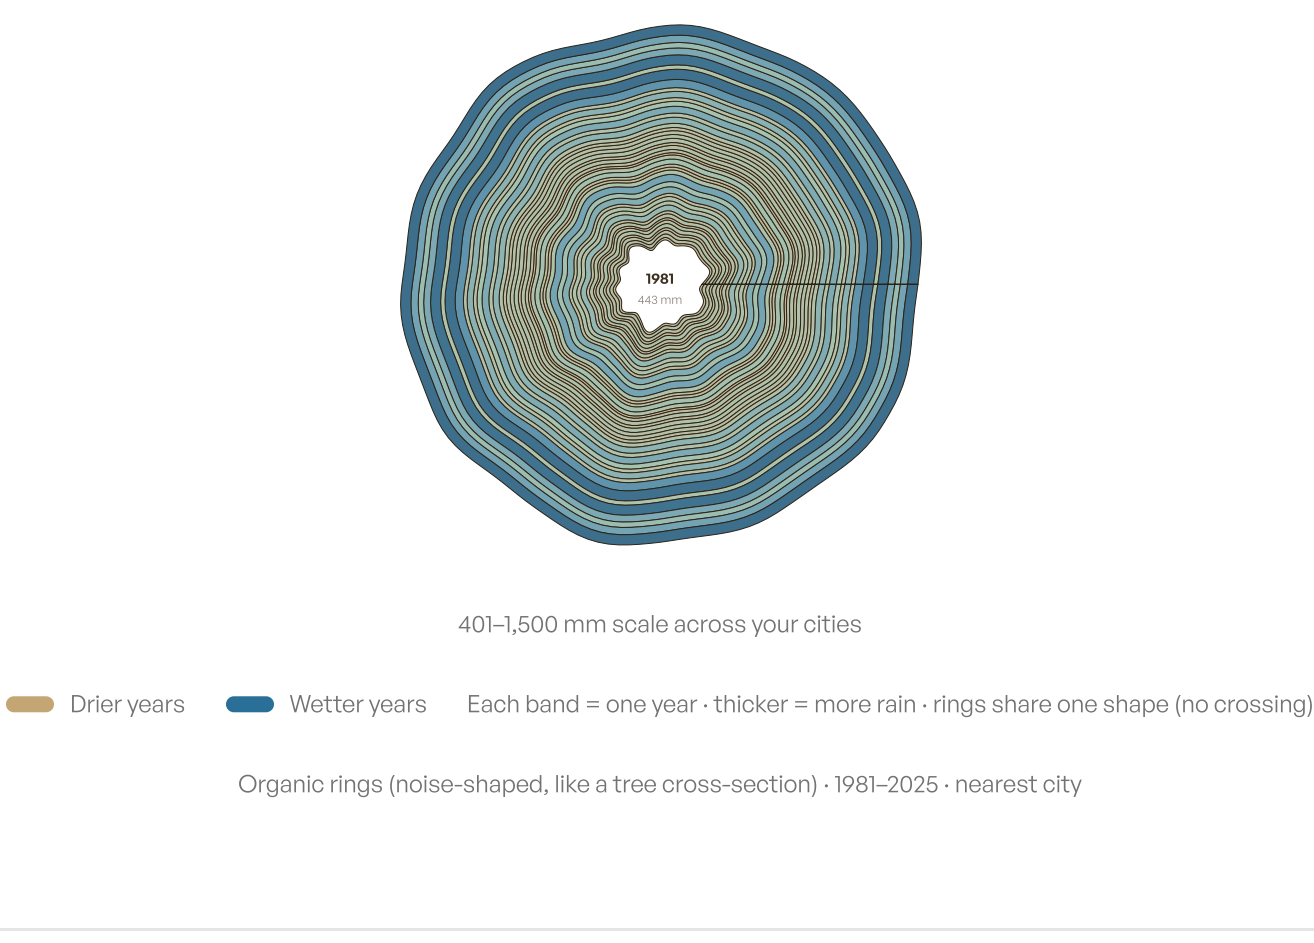

Jhārkhand now averages about 3.2 days per year with 50mm+ rain — up from 1.2 during 1979–1983. Same calendar, harder hits.

Rainfall memory

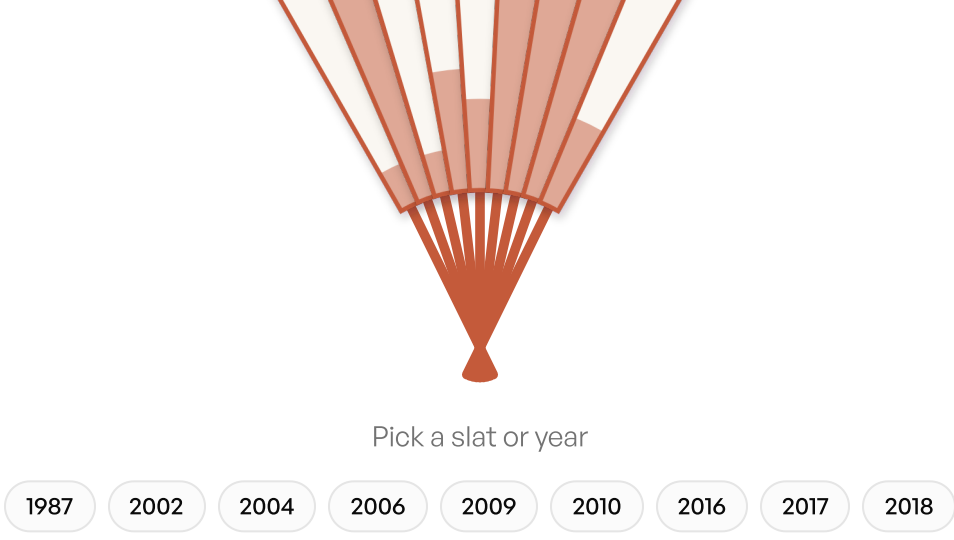

Wet and dry years in Jhārkhand.

You lived through 45 rainy seasons there since 1981. 47% of those years were wetter than your own median — your soggiest was 2025 (1,500 mm), your driest 2002.

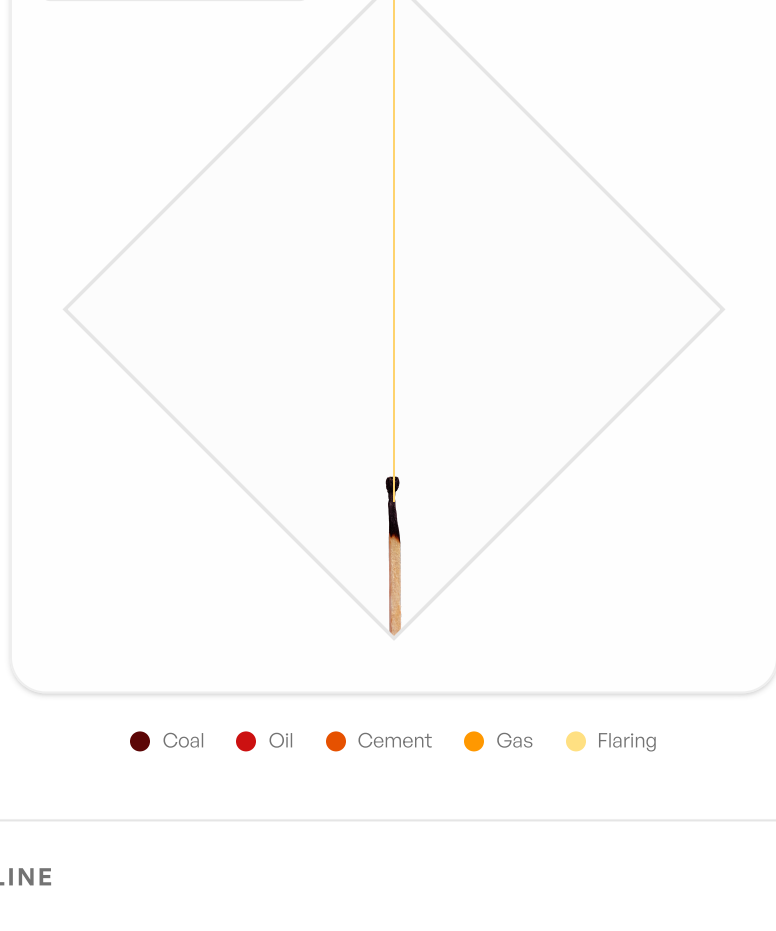

You've lived through 9 record-hot years.

Top 10 at each home since 1940 · taller shading = hotter peak
Other India peaks use ERA5 grid cells (~25 km) until station history is loaded.

India's carbon emissions across your lifetime

National CO₂ emissions from 1981 to 2024 by fuel and industry source. In your birth year (1981), India emitted 315 Mt of CO₂, which has since grown to 3,193.5 Mt today (10.1× higher).

In 2024, when you were age 43, global CO₂ was **424 ppm**. India emitted **3,193.5 Mt** of CO₂. This is **10.1×** the emissions level of your birth year (315 Mt, when global CO₂ was 340.1 ppm; today it is 427.4 ppm).

🔍 **Interpretation:** The diamond shapes your timeline from birth (bottom matchstick head) to today (top vertex). The organic stacked plume represents CO₂ emissions contributions by source: Coal, Oil, Cement, Gas, and Flaring, which expand like smoke as emissions grow.

What the numbers mean

Your climate story, interpreted.

Numbers alone don't tell the story. Here's what changed across three generations in Jhārkhand.

As prescribed by your climate pandit

Your *upaay*.

Every kundli comes with remedies. These have been computed from your personal climate data and endorsed by the relevant deities.

2 VISHWAKARMA

The problem: Your per-capita share of India's CO₂ since you were born: ~42 tonnes.

To offset this, you would need to forgo 6.0M AI queries — or stop using AI entirely for 1,644 years. This prescription is self-aware. We recommend beginning immediately. The deity of technology has already noted the irony.

3 VARUNA DEV

The problem: Sea levels rose 21mm since you were born.

Drink 2 fewer glasses of water per week. It will not help, but the gesture is spiritually significant. Additionally, place 1 ice cube in the ocean annually. Do this at dawn. Do not explain yourself to bystanders.

4 ARANYANI

The problem: You have survived 9 of the hottest years on record since 1940.

Perform Vriksha Vivah with 3 trees. This classical practice—adapted here for climate dosh—requires formal betrothal to 3 living trees. Budget approximately ₹12,600 for the ceremonies. The trees cannot object. They also cannot water themselves. This is now your responsibility.

* These remedies are satirical and scientifically non-binding. Your actual carbon footprint requires less theatrical and more structural intervention.
