As prescribed by your climate pandit

# Your upaay.

Every kundli comes with remedies. These have been computed from your personal climate data and endorsed by the relevant deities.

**2 VISHWAKARMA**

*The problem: Your per-capita share of India's CO<sub>2</sub> since you were born: ~38 tonnes.*

To offset this, you would need to forgo 5.4M AI queries — or stop using AI entirely for 1,487 years. This prescription is self-aware. We recommend beginning immediately. The deity of technology has already noted the irony.

**3 VARUNA DEV**

*The problem: Sea levels rose 19mm since you were born.*

Drink 2 fewer glasses of water per week. It will not help, but the gesture is spiritually significant. Additionally, place 1 ice cube in the ocean annually. Do this at dawn. Do not explain yourself to bystanders.

**4 ARANYANI**

*The problem: You have survived 2 of the hottest years on record since 1940.*

Perform Vriksha Vivah with 1 tree. This classical practice—adapted here for climate dosh—requires formal betrothal to 1 living tree. Budget approximately ₹4,200 for the ceremony. The trees cannot object. They also cannot water themselves. This is now your responsibility.

\* These remedies are satirical and scientifically non-binding. Your actual carbon footprint requires less theatrical and more structural intervention.
