As prescribed by your climate pandit

Your upaay.

Every kundli comes with remedies. These have been computed from your personal climate data and endorsed by the relevant deities.

1 AGNI DEV

96.4% guaranteed

The problem: December is now 0.6°C hotter than when you were born.

Drink your chai at 67°C — exactly 3°C cooler than a proper cup. Every day. For life. It will taste wrong. That is the point. Agni Dev has determined that a 0.6°C warmer world earns a 3°C cooler cup. A thermometer will be required. Guessing is not permitted.

2 VISHWAKARMA

≈% guaranteed

The problem: Your per-capita share of India's CO₂ since you were born: ~35 tonnes.

To offset this, you would need to forgo 5.0M AI queries — or stop using AI entirely for 1,370 years. This prescription is self-aware. We recommend beginning immediately. The deity of technology has already noted the irony.

3 VARUNA DEV

188% guaranteed

The problem: Sea levels rose 4mm since you were born.

Drink 1 fewer glass of water per week. It will not help, but the gesture is spiritually significant. Additionally, place 1 ice cube in the ocean annually. Do this at dawn. Do not explain yourself to bystanders.

4 ARANYANI

Ask your elders guaranteed

The problem: You have survived 6 of the hottest years on record since 1940.

Perform Vriksha Vivah with 2 trees. This classical practice—adapted here for climate dosh—requires formal betrothal to 2 living trees. Budget approximately ₹8,400 for the ceremonies. The trees cannot object. They also cannot water themselves. This is now your responsibility.

5 PITRU DEV

Generationally certified guaranteed

The problem: Temperatures rose 0.4°C from your parents' childhood to today.

Fan your parents for 15 minutes daily as generational reparations. Hand-held palm-leaf fan only — electricity would defeat the purpose and insult Pitru Dev. Your parents may protest. This is between you and the ancestors now.
