

How does your childhood compare to the climate of today?

Nagpur bucked the trend.

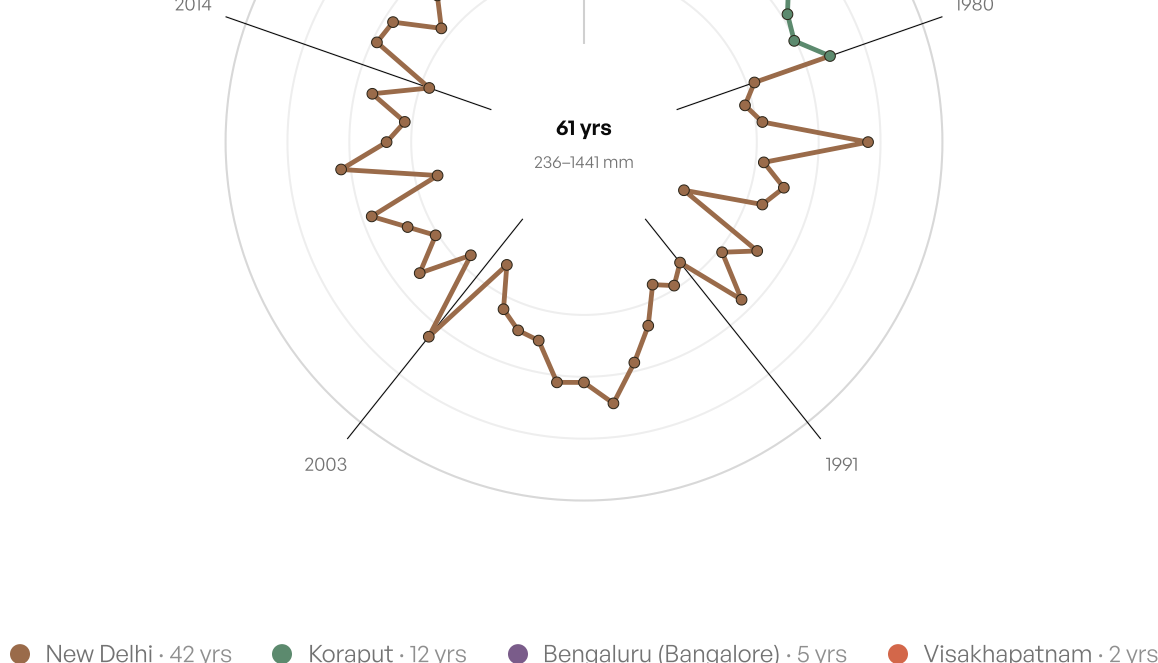

An average May now runs 2.3°C cooler than during 1967–1971.

Your orbit

One line, every home you have known.

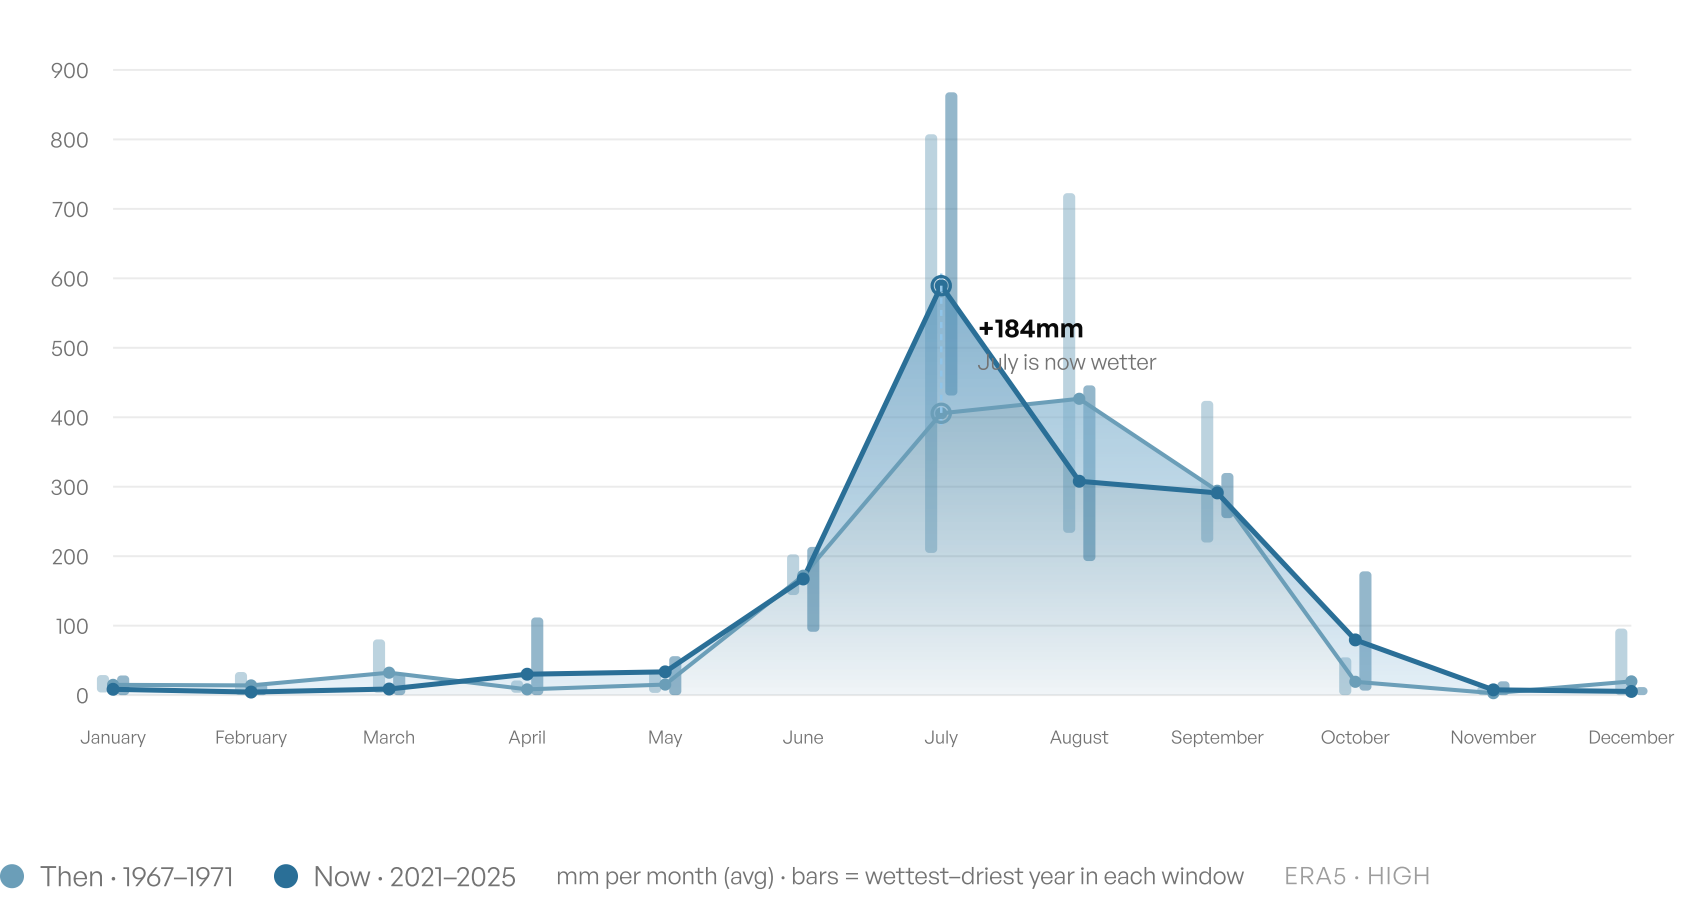

Years stitched clockwise from birth. Wettest: 2021 in Bengaluru (Bangalore) (1,441 mm). Driest: 1987 (236 mm).

Rain

Extreme rain days eased.

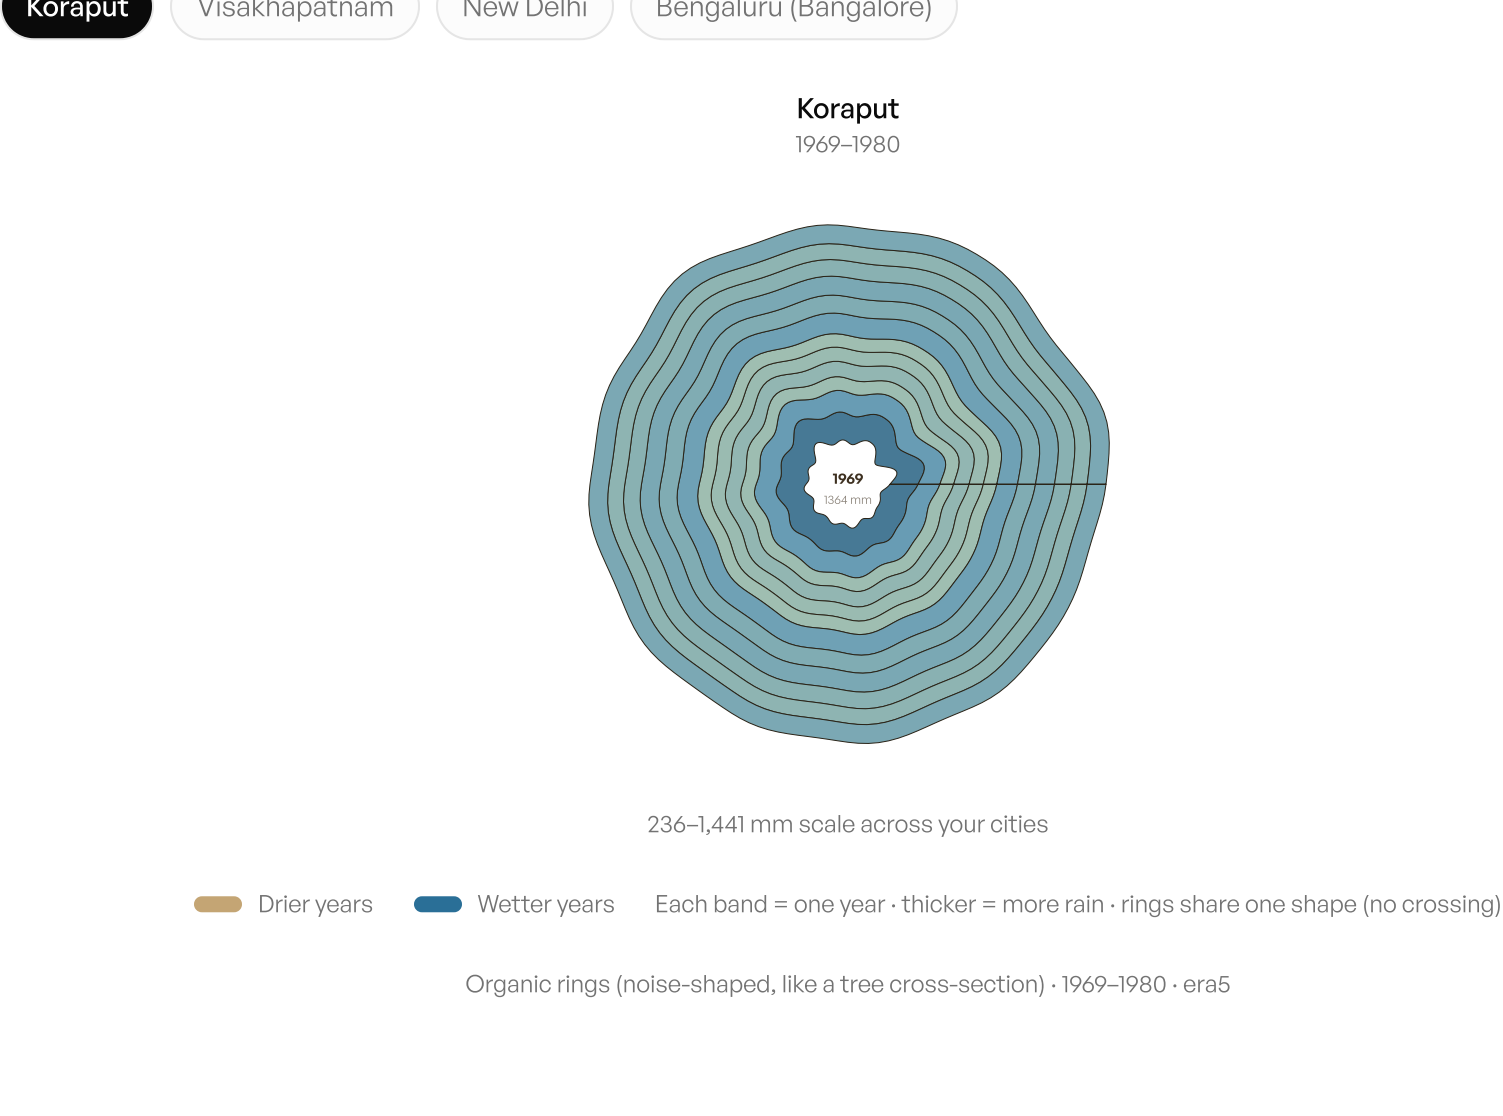

Nagpur sees about 1.2 fewer 50mm+ days per year than during 1967–1971.

Rainfall memory

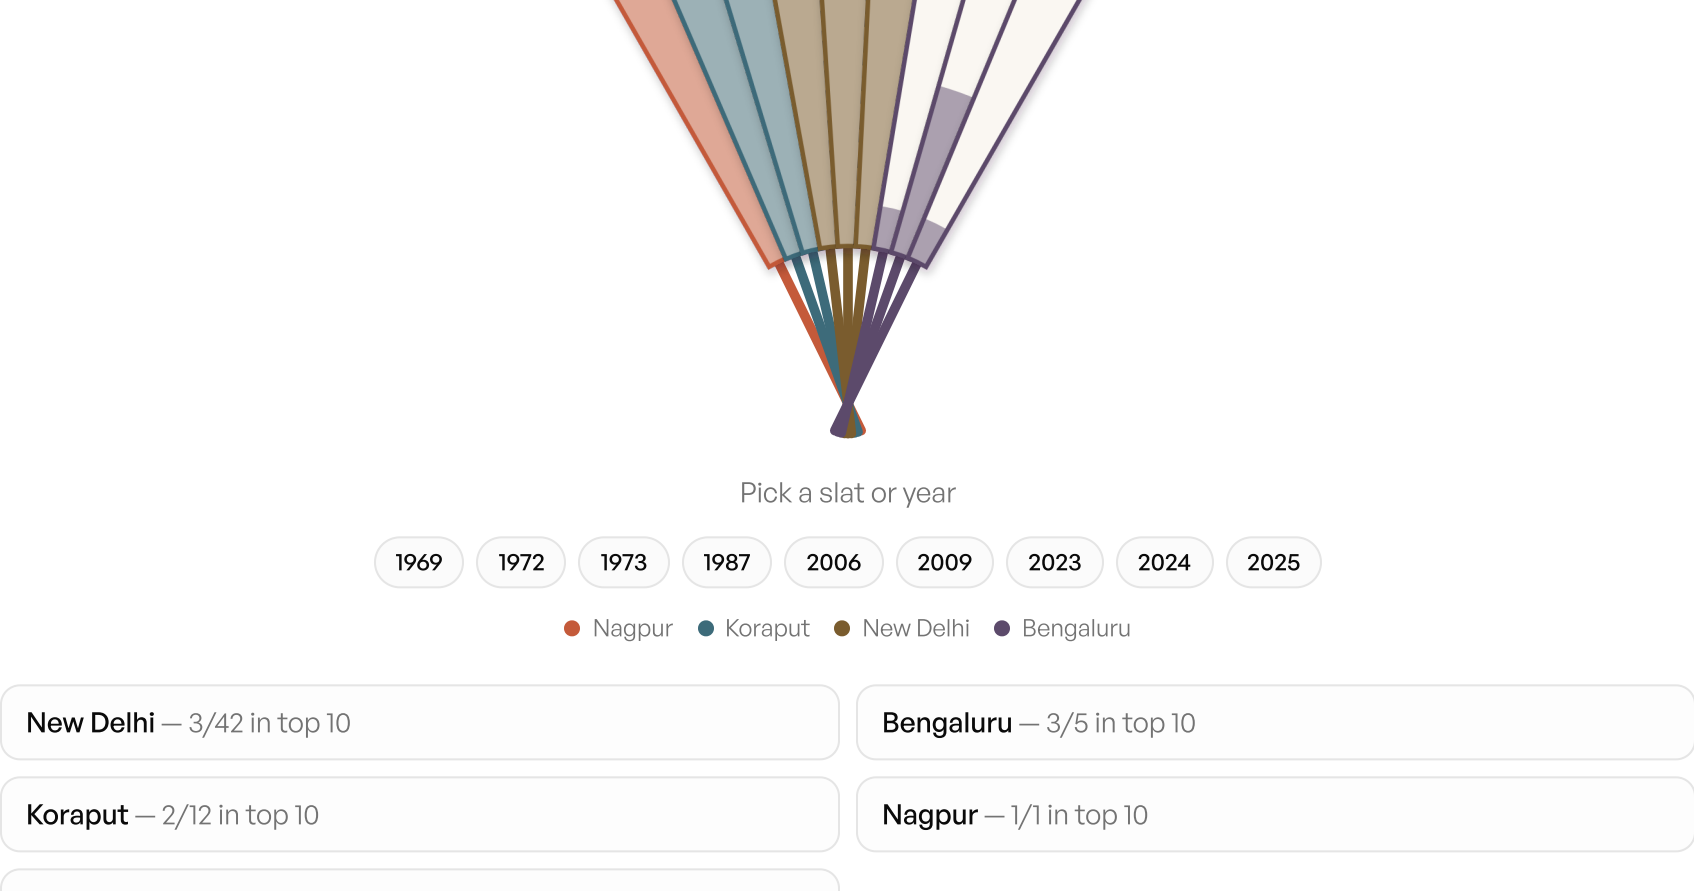

Wet and dry years in Koraput.

You lived through 12 rainy seasons there since 1969. 50% of those years were wetter than your own median — your soggiest was 1969 (1,364 mm), your driest 1974.

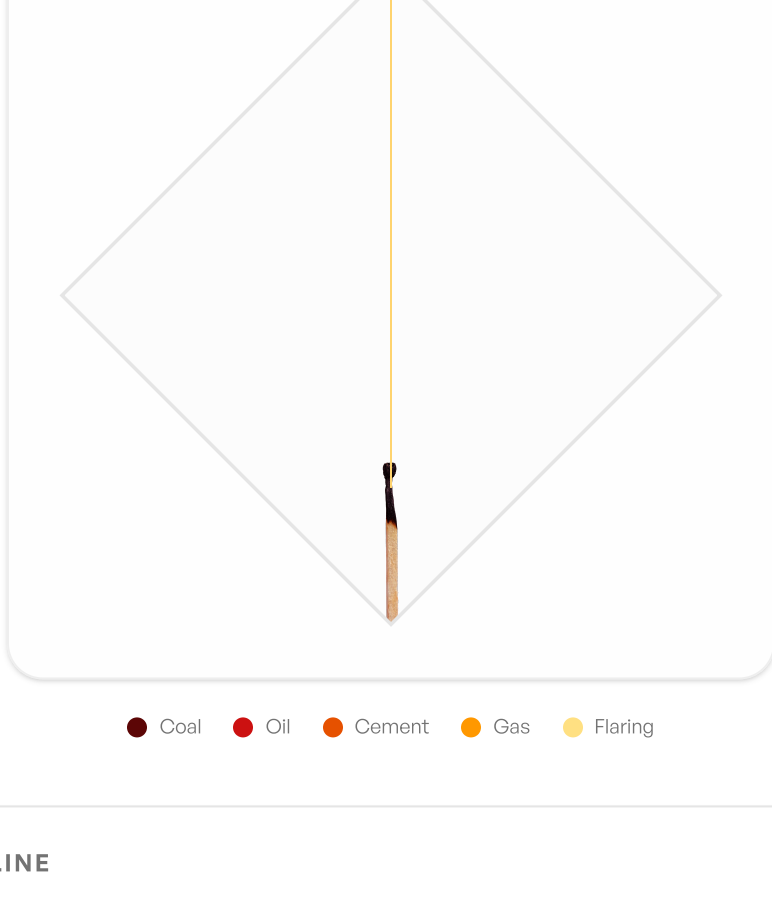

You've lived through 9 record-hot years.

Top 10 at each home since 1940 · taller shading = hotter peak
Other India peaks use ERA5 grid cells (~25 km) until station history is loaded.

India's carbon emissions across your lifetime

National CO₂ emissions from 1969 to 2024 by fuel and industry source. In your birth year (1969), India emitted 177.4 Mt of CO₂, which has since grown to 3,193.5 Mt today (18× higher).

In 2024, when you were age 55, global CO₂ was 424 ppm. India emitted 3,193.5 Mt of CO₂. This is 18.0× the emissions level of your birth year (177.4 Mt, when global CO₂ was 324.6 ppm; today it is 427.4 ppm).

Interpretation: The diamond shapes your timeline from birth (bottom matchstick head) to today (top vertex). The organic stacked plume represents CO₂ emissions contributions by source: Coal, Oil, Cement, Gas, and Flaring, which expand like smoke as emissions grow.

What the numbers mean

Your climate story, interpreted.

Numbers alone don't tell the story. Here's what changed across three generations in Nagpur.

THREE-GENERATION TEMPERATURE ARC · NAGPUR

YOUR PARENTS' CHILDHOOD
1942–1946

26.7°C
annual mean
Hottest: May · 35.6°

YOUR CHILDHOOD
1967–1971

26.9°C

Hottest: May · 35.6°

TODAY
2021–2025

27.2°C
annual mean
Hottest: May · 33.4°

Across 81 years, Nagpur warmed by +0.45°C on average — from your parents' era to today.

ATMOSPHERIC CO₂

Since 1969

Then 324.6 ppm → Now 427.4 ppm

+102.8 ppm

The last time CO₂ was this high, humans didn't exist.

SEA LEVEL RISE

Since 1969

Then 0 mm → Now +21 mm

+21 mm

Small numbers, compounding consequences.

As prescribed by your climate pandit

Your upaay.

Every kundli comes with remedies. These have been computed from your personal climate data and endorsed by the relevant deities.

2 VISHWAKARMA

The problem: Your per-capita share of India's CO₂ since you were born: ~44 tonnes.

To offset this, you would need to forgo 6.3M AI queries — or stop using AI entirely for 1,722 years. This prescription is self-aware. We recommend beginning immediately. The deity of technology has already noted the irony.

3 VARUNA DEV

The problem: Sea levels rose 21mm since you were born.

Drink 2 fewer glasses of water per week. It will not help, but the gesture is spiritually significant. Additionally, place 1 ice cube in the ocean annually. Do this at dawn. Do not explain yourself to bystanders.

4 ARANYANI

The problem: You have survived 9 of the hottest years on record since 1940.

Perform Vriksha Vivah with 3 trees. This classical practice—adapted here for climate dosh—requires formal betrothal to 3 living trees. Budget approximately ₹12,600 for the ceremonies. The trees cannot object. They also cannot water themselves. This is now your responsibility.

5 PITRU DEV

The problem: Temperatures rose 0.5°C from your parents' childhood to today.

Fan your parents for 18 minutes daily as generational reparation. Hand-held palm-leaf fan only — electricity would defeat the purpose and insult Pitru Dev. Your parents may protest. This is between you and the ancestors now.

* These remedies are satirical and scientifically non-binding. Your actual carbon footprint requires less theatrical and more structural intervention.
