

How does your childhood compare to the climate of today?

New Delhi bucked the trend.

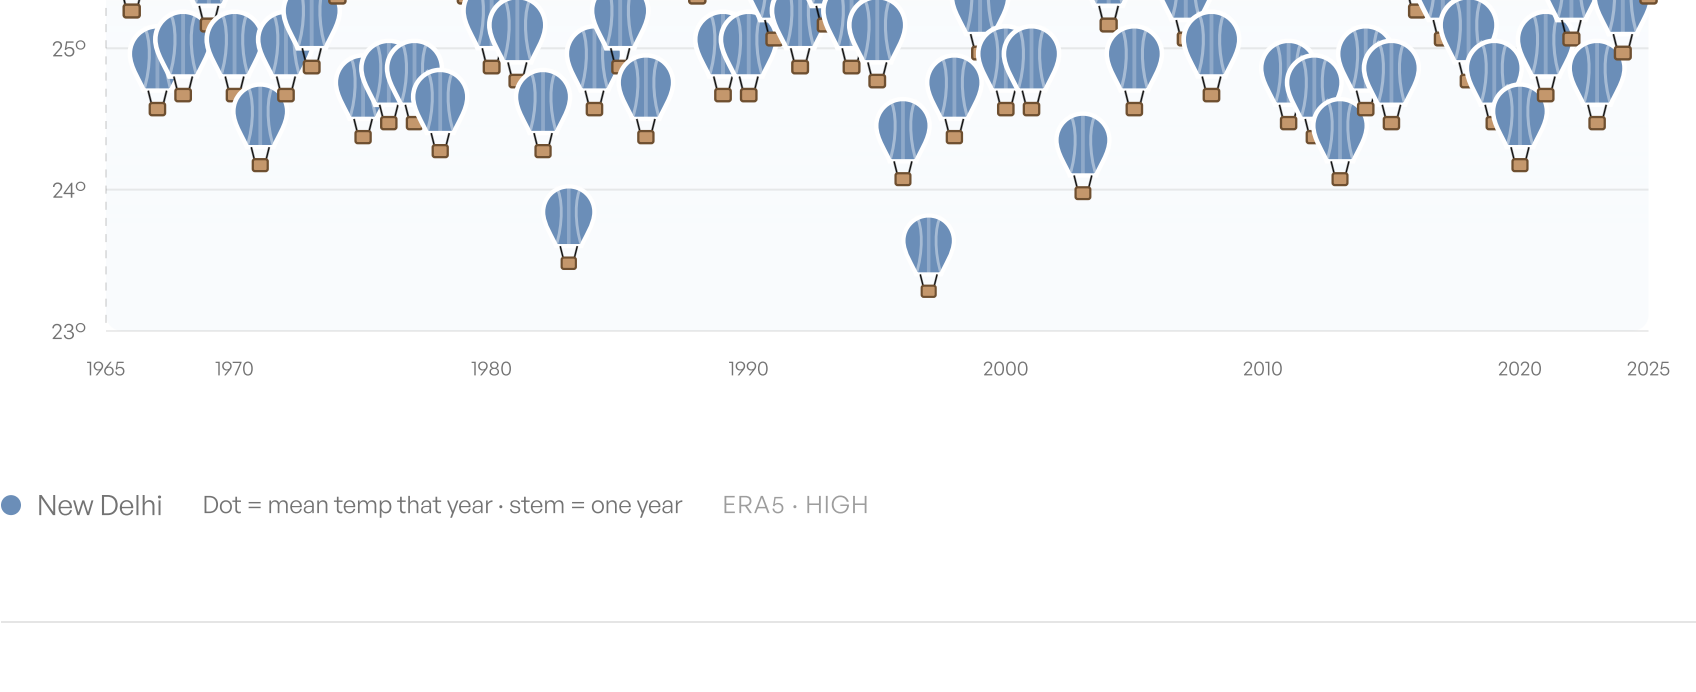

An average June now runs 2.5°C cooler than during 1963–1967.

Your climate trail

Temperature, year by year, where you lived.

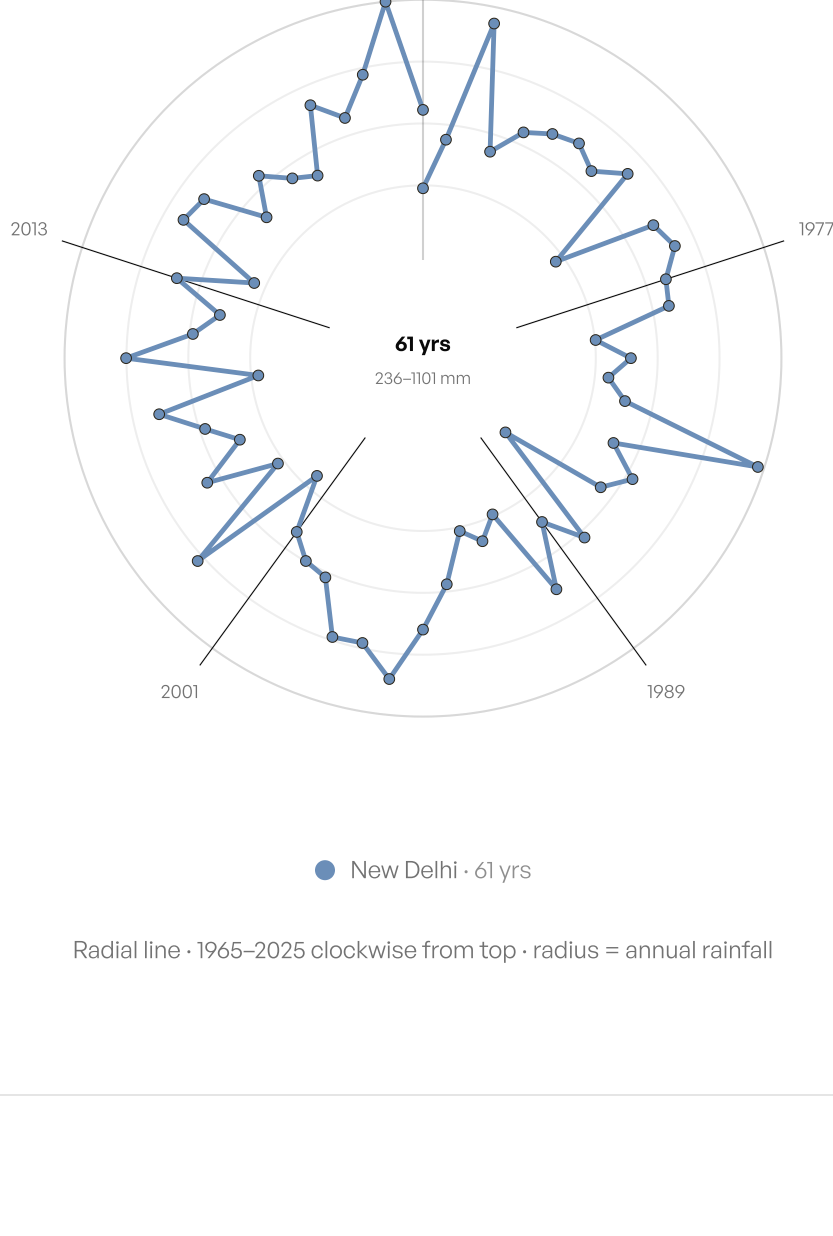

61 years from 1965 to 2025. Each dot is the mean temperature for that calendar year.

Your orbit

New Delhi, year by year.

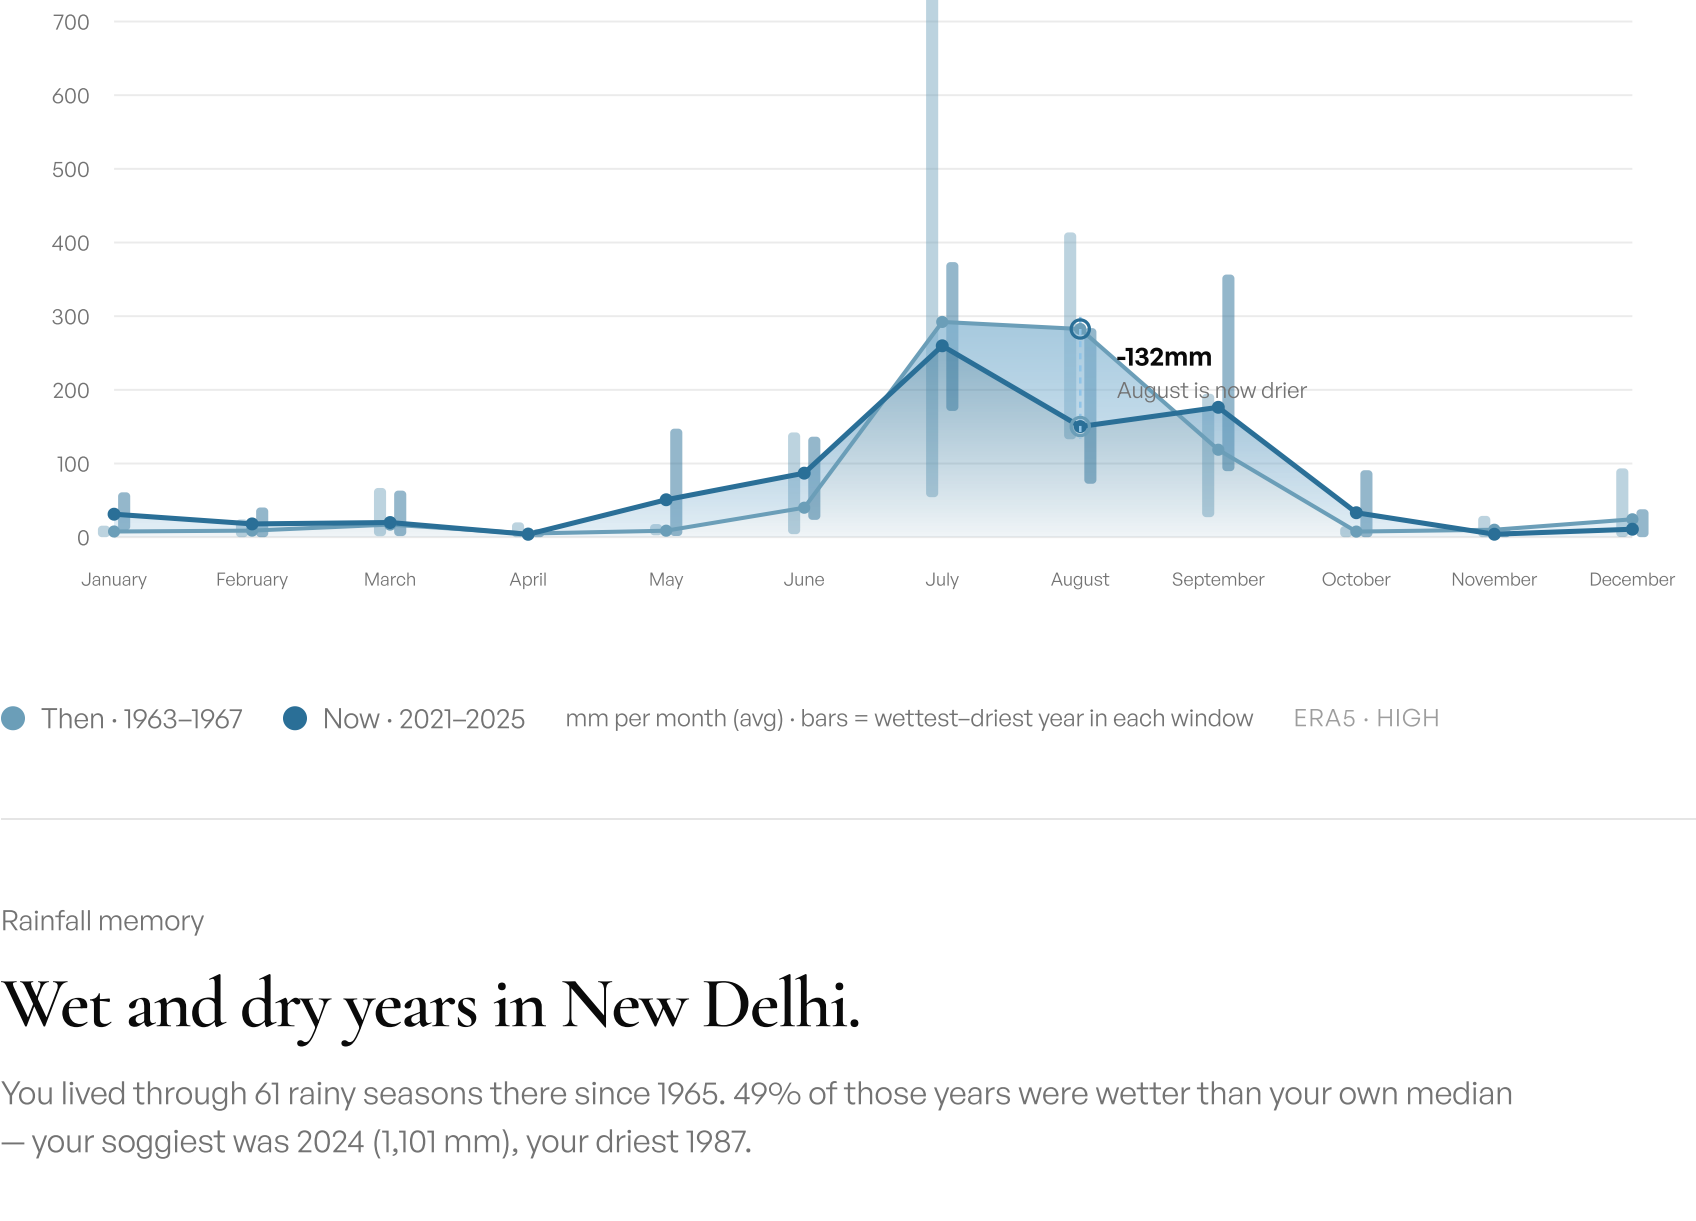

A line chart wrapped round — each point is one year, distance from centre is how much it rained.

Rain

Your monsoon rhythm shifted.

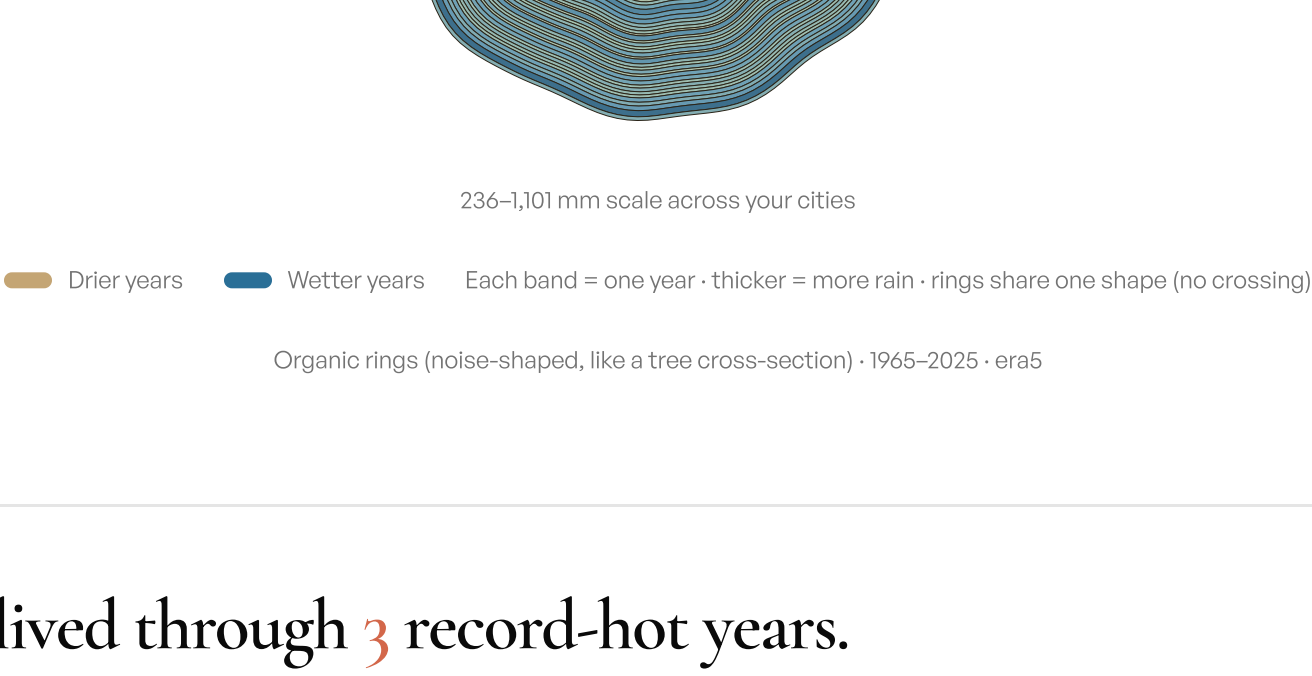

June–September rainfall at New Delhi is about 8% drier now than during 1963–1967.

Rainfall memory

Wet and dry years in New Delhi.

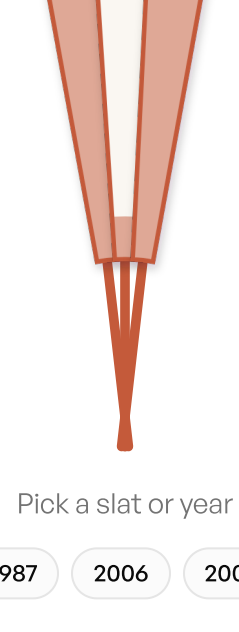

You lived through 61 rainy seasons there since 1965. 49% of those years were wetter than your own median — your soggiest was 2024 (1,101 mm), your driest 1987.

You've lived through 3 record-hot years.

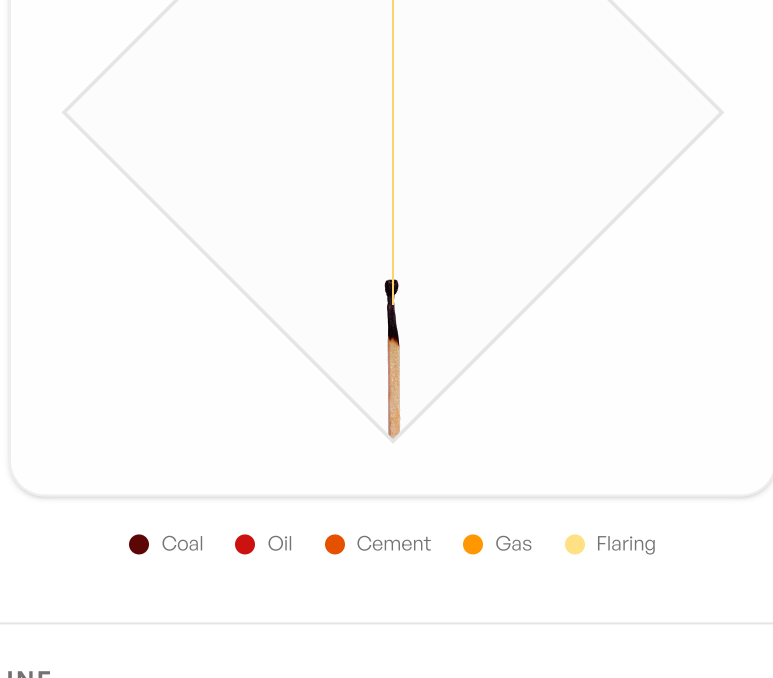

Top 10 at each home since 1940 - taller shading = hotter peak

India's carbon emissions across your lifetime

National CO₂ emissions from 1965 to 2024 by fuel and industry source. In your birth year (1965), India emitted 153.7 Mt of CO₂, which has since grown to 3,193.5 Mt today (20.8× higher).

In **2024**, when you were age 59, global CO₂ was **424 ppm**. India emitted **3,193.5 Mt** of CO₂. This is **20.8×** the emissions level of your birth year (153.7 Mt, when global CO₂ was 320 ppm; today it is 427.4 ppm).

Interpretation: The diamond shapes your timeline from birth (bottom matchstick head) to today (top vertex). The organic stacked plume represents CO₂ emissions contributions by source: Coal, Oil, Cement, Gas, and Flaring, which expand like smoke as emissions grow.

What the numbers mean

Your climate story, interpreted.

Numbers alone don't tell the story. Here's what changed across three generations in New Delhi.

THREE-GENERATION TEMPERATURE ARC · NEW DELHI

YOUR PARENTS' CHILDHOOD

1940–1942

26.2°C

annual mean

Hottest: May · 35.4°

YOUR CHILDHOOD

1963–1967

25.2°C

annual mean

Hottest: Jun · 35.3°

TODAY

2021–2025

annual mean

Hottest: Jun · 32.8°

Across 83 years, New Delhi warmed by **-1.20°C** on average — from your parents' era to today.

ATMOSPHERIC CO₂

Since 1965

Then **320 ppm** → Now **427.4 ppm**

+107.4 ppm

The last time CO₂ was this high, humans didn't exist.

SEA LEVEL RISE

Since 1965

Then **0 mm** → Now **+21 mm**

+21 mm

Small numbers, compounding consequences.

As prescribed by your climate pandit

Your *upaay*.

Every kundli comes with remedies. These have been computed from your personal climate data and endorsed by the relevant deities.

2 VISHWAKARMA

The problem: Your per-capita share of India's CO₂ since you were born: ~45 tonnes.

To offset this, you would need to forgo 6.4M AI queries — or stop using AI entirely for 1,761 years. This prescription is self-aware. We recommend beginning immediately. The deity of technology has already noted the irony.

3 VARUNA DEV

The problem: Sea levels rose 21mm since you were born.

Drink 2 fewer glasses of water per week. It will not help, but the gesture is spiritually significant. Additionally, place 1 ice cube in the ocean annually. Do this at dawn. Do not explain yourself to bystanders.

4 ARANYANI

The problem: You have survived 3 of the hottest years on record since 1940.

Perform Vriksha Vivah with 1 tree. This classical practice—adapted here for climate dosh—requires formal betrothal to 1 living tree. Budget approximately ₹4,200 for the ceremony. The trees cannot object. They also cannot water themselves. This is now your responsibility.

* These remedies are satirical and scientifically non-binding. Your actual carbon footprint requires less theatrical and more structural intervention.
