

How does your childhood compare to the climate of today?

New Delhi got hotter while you grew up.

An average April is now 1.6°C warmer than during 1991–1995.

Your orbit

One line, every home you have known.

Years stitched clockwise from birth. Wettest: 2018 in Nice (1,216 mm). Driest: 2002 (402 mm).

Rain

Your monsoon rhythm shifted.

June–September rainfall at New Delhi is about 41% wetter now than during 1991–1995.

Rainfall memory

Wet and dry years in New Delhi.

You lived through 23 rainy seasons there since 1993. 48% of those years were wetter than your own median — your soggiest was 1996 (976 mm), your driest 2002.

You've lived through 11 record-hot years.

Top 10 at each home since 1940 · taller shading = hotter peak
Other India peaks use ERA5 grid cells (~25 km) until station history is loaded.

India's carbon emissions across your lifetime

National CO₂ emissions from 1993 to 2024 by fuel and industry source. In your birth year (1993), India emitted 677.3 Mt of CO₂, which has since grown to 3,193.5 Mt today (4.7× higher).

In 2024, when you were age 31, global CO₂ was 424 ppm. India emitted 3,193.5 Mt of CO₂. This is 4.7× the emissions level of your birth year (677.3 Mt, when global CO₂ was 357.2 ppm; today it is 427.4 ppm).

Interpretation: The diamond shapes your timeline from birth (bottom matchstick head) to today (top vertex). The organic stacked plume represents CO₂ emissions contributions by source: Coal, Oil, Cement, Gas, and Flaring, which expand like smoke as emissions grow.

What the numbers mean

Your climate story, interpreted.

Numbers alone don't tell the story. Here's what changed across three generations in New Delhi.

As prescribed by your climate pandit

Your upaay.

Every kundli comes with remedies. These have been computed from your personal climate data and endorsed by the relevant deities.

1 AGNI DEV

96.4% guaranteed

The problem: April is now 1.6°C hotter than when you were born.

Drink your chai at 62°C — exactly 8°C cooler than a proper cup. Every day. For life. It will taste wrong. That is the point. Agni Dev has determined that a 1.6°C warmer world earns a 8°C cooler cup. A thermometer will be required. Guessing is not permitted.

2 VISHWAKARMA

0% guaranteed

The problem: Your per-capita share of India's CO₂ since you were born: ~38 tonnes.

To offset this, you would need to forgo 5.4M AI queries — or stop using AI entirely for 1,487 years. This prescription is self-aware. We recommend beginning immediately. The deity of technology has already noted the irony.

3 VARUNA DEV

188% guaranteed

The problem: Sea levels rose 19mm since you were born.

Drink 2 fewer glasses of water per week. It will not help, but the gesture is spiritually significant. Additionally, place 1 ice cube in the ocean annually. Do this at dawn. Do not explain yourself to bystanders.

4 ARANYANI

Ask your elders guaranteed

The problem: You have survived 11 of the hottest years on record since 1940.

Perform Vriksha Vivah with 4 trees. This classical practice—adapted here for climate dosh—requires formal betrothal to 4 living trees. Budget approximately ₹16,800 for the ceremonies. The trees cannot object. They also cannot water themselves. This is now your responsibility.

* These remedies are satirical and scientifically non-binding. Your actual carbon footprint requires less theatrical and more structural intervention.
