

How does your childhood compare to the climate of today?

Odisha bucked the trend.

An average May now runs 1.2°C cooler than during 1976–1980.

Your climate trail

The air got warmer year by year.

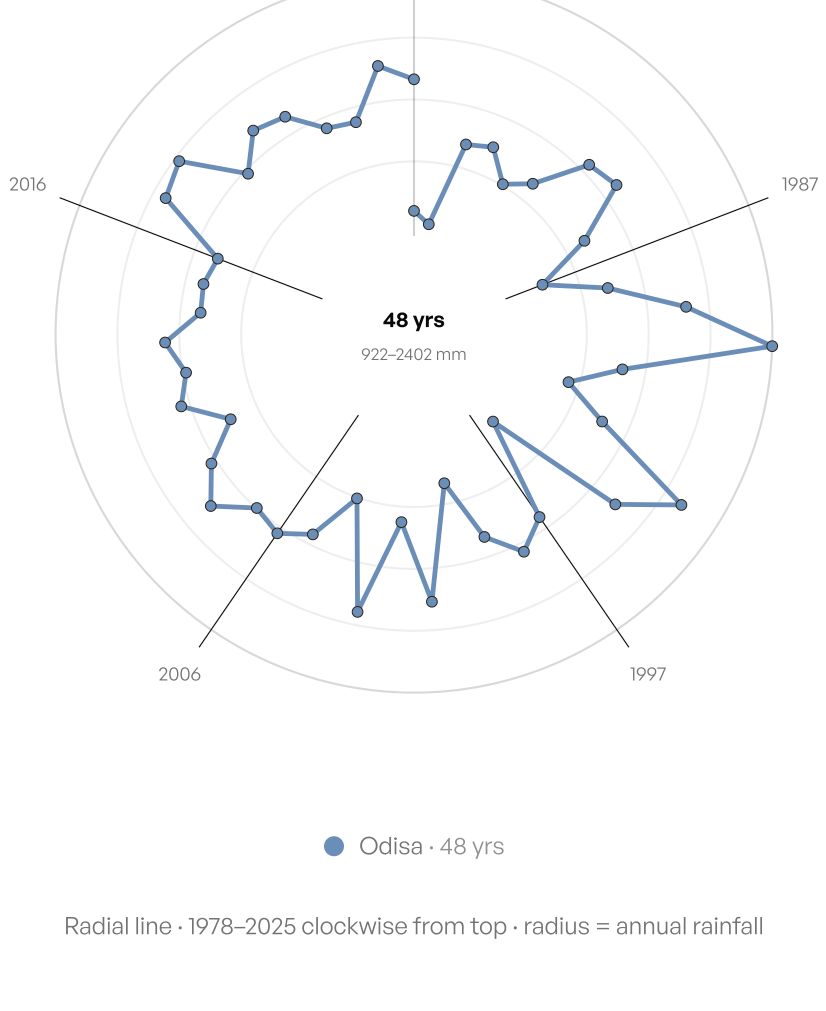

Across 48 years in Odisha, annual mean temperature rose 0.4°C from 1978 to 2025 — your warmest year so far was 2009.

Your orbit

Odisha, year by year.

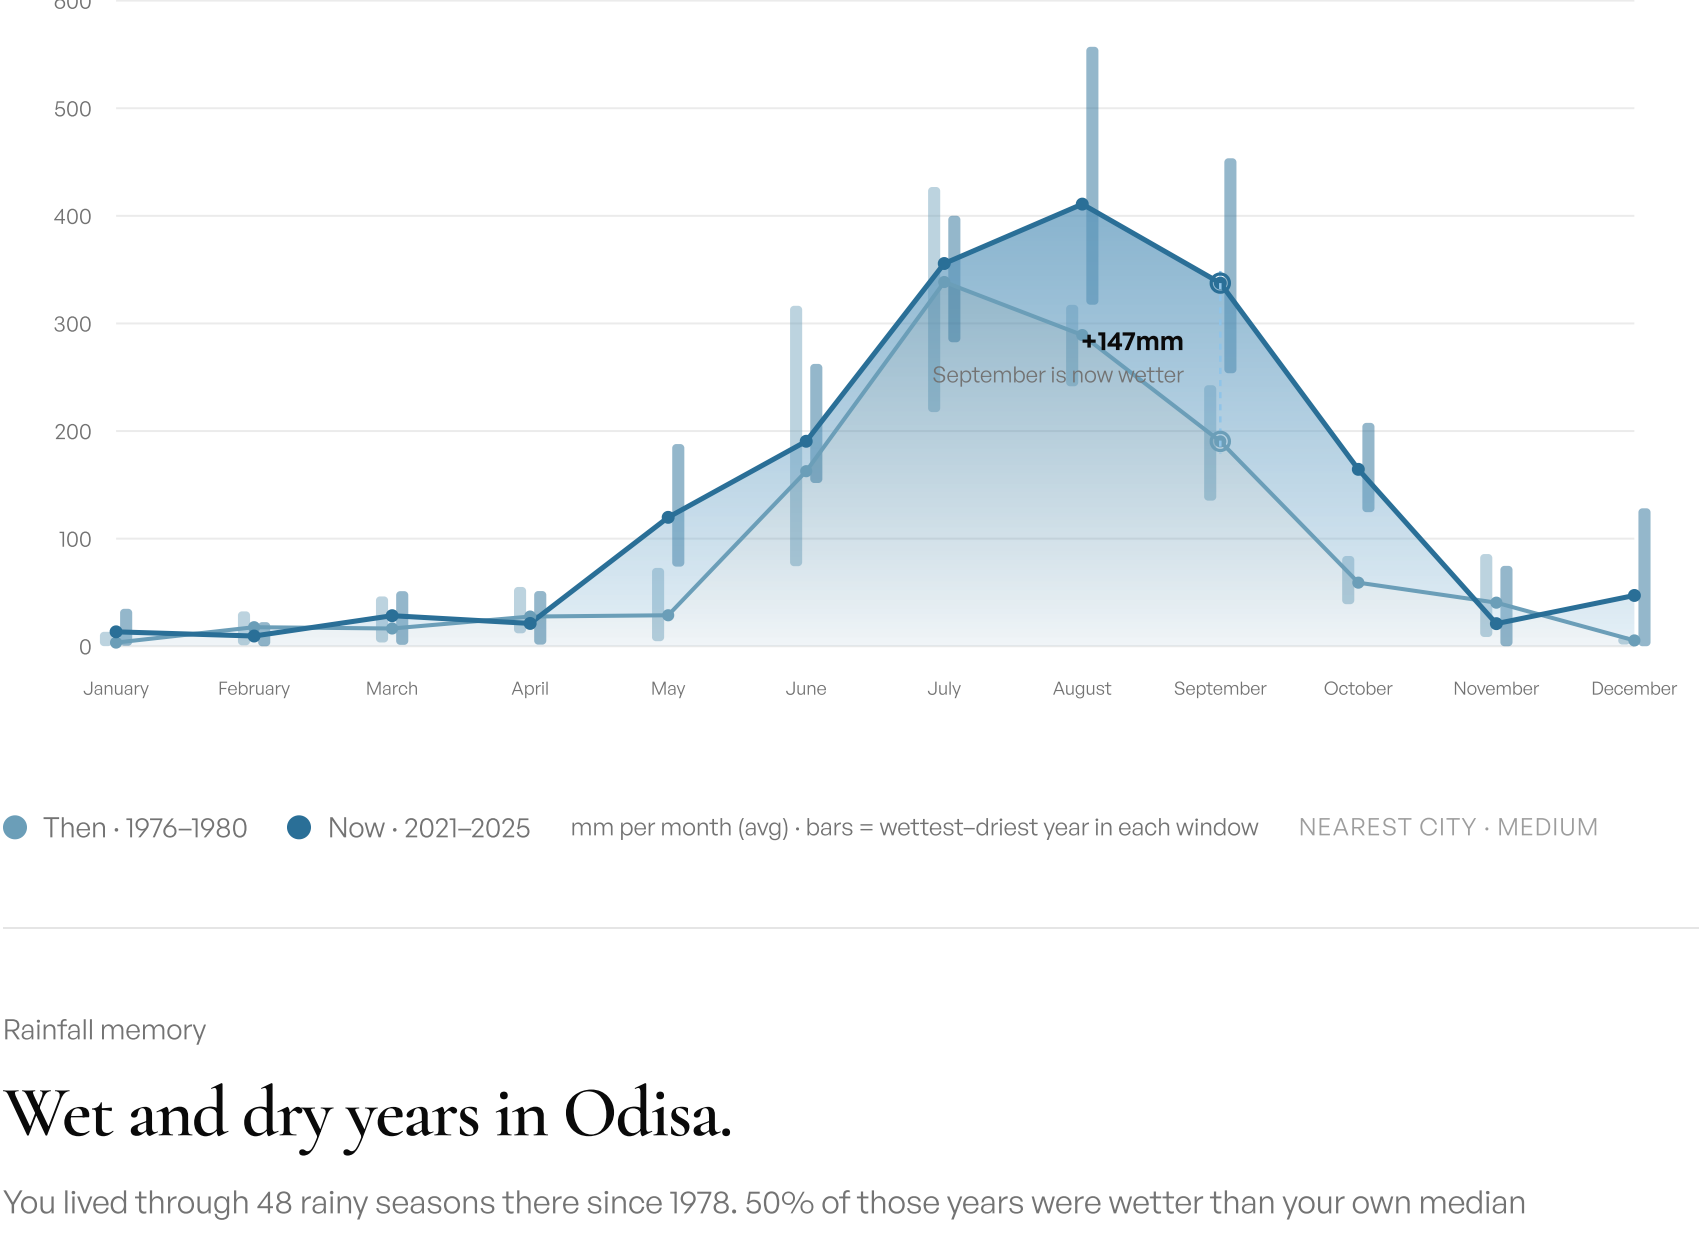

A line chart wrapped round — each point is one year, distance from centre is how much it rained.

Rain

Downpours are stacking up.

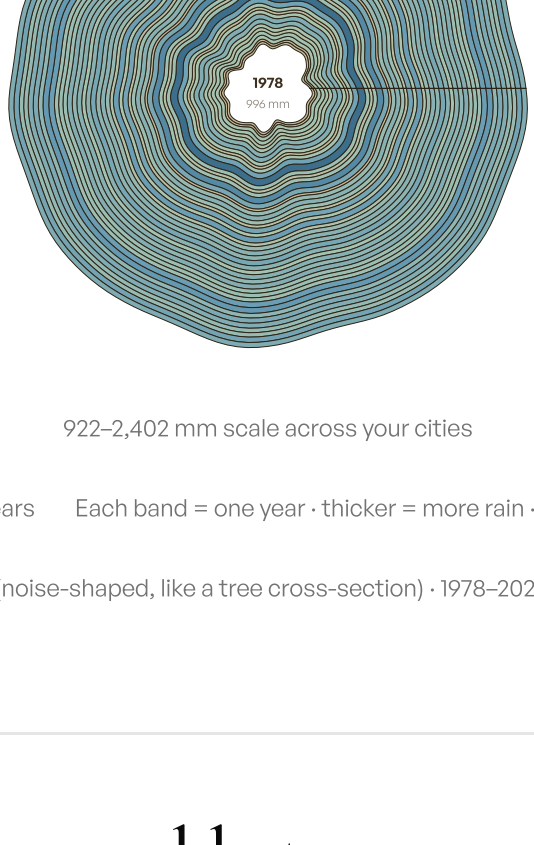

Odisha now averages about 2.2 days per year with 50mm+ rain — up from 0.6 during 1976–1980. Same calendar, harder hits.

Rainfall memory

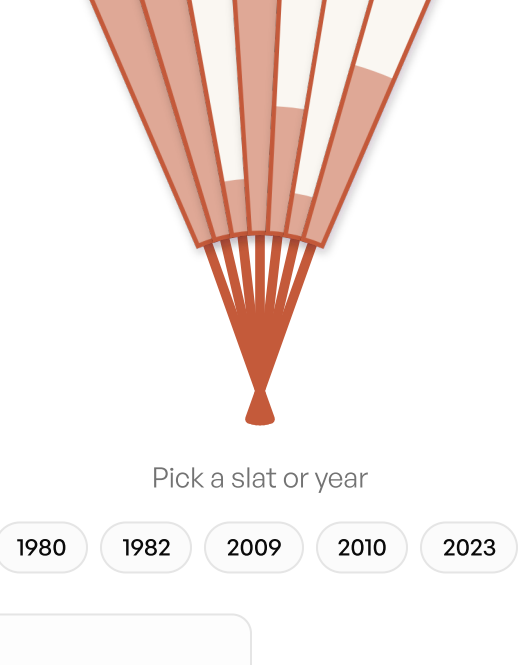

Wet and dry years in Odisha.

You lived through 48 rainy seasons there since 1978. 50% of those years were wetter than your own median — your soggiest was 1990 (2,402 mm), your driest 1979.

You've lived through 7 record-hot years.

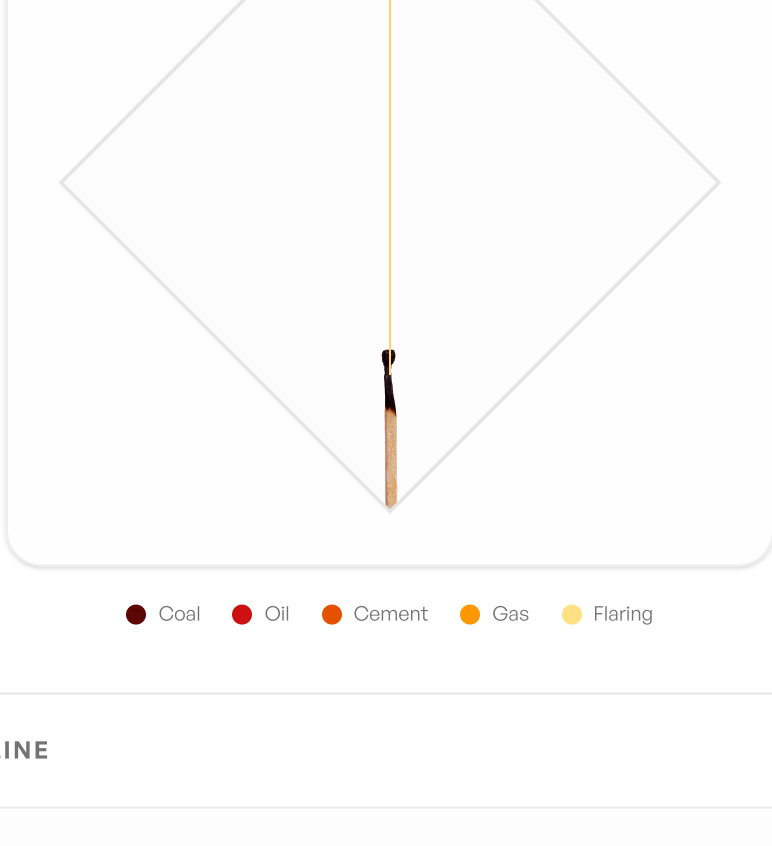

Top 10 at each home since 1940 · taller shading = hotter peak
Other India peaks use ERA5 grid cells (~25 km) until station history is loaded.

In 2024, when you were age 46, global CO₂ was 424 ppm. India emitted 3,193.5 Mt of CO₂. This is 12.1× the emissions level of your birth year (263.2 Mt, when global CO₂ was 335.4 ppm; today it is 427.4 ppm).

Interpretation: The diamond shapes your timeline from birth (bottom matchstick head) to today (top vertex). The organic stacked plume represents CO₂ emissions contributions by source: Coal, Oil, Cement, Gas, and Flaring, which expand like smoke as emissions grow.

What the numbers mean

Your climate story, interpreted.

Numbers alone don't tell the story. Here's what changed across three generations in Odisha.

As prescribed by your climate pandit

Your upaay.

Every kundli comes with remedies. These have been computed from your personal climate data and endorsed by the relevant deities.

2

VISHWAKARMA

with guaranteed

The problem: Your per-capita share of India's CO₂ since you were born: ~43 tonnes.

To offset this, you would need to forgo 6.1M AI queries — or stop using AI entirely for 1,683 years. This prescription is self-aware. We recommend beginning immediately. The deity of technology has already noted the irony.

3

VARUNA DEV

100% guaranteed

The problem: Sea levels rose 21mm since you were born.

Drink 2 fewer glasses of water per week. It will not help, but the gesture is spiritually significant. Additionally, place 1 ice cube in the ocean annually. Do this at dawn. Do not explain yourself to bystanders.

4

ARANYANI

Ask your elders guaranteed

The problem: You have survived 7 of the hottest years on record since 1940.

Perform Vriksha Vivah with 3 trees. This classical practice—adapted here for climate dosh—requires formal betrothal to 3 living trees. Budget approximately ₹12,600 for the ceremonies. The trees cannot object. They also cannot water themselves. This is now your responsibility.

5

PITRU DEV

Generationally certified guaranteed

The problem: Temperatures rose 1.1°C from your parents' childhood to today.

Fan your parents for 42 minutes daily as generational reperation. Hand-held palm-leaf fan only — electricity would defeat the purpose and insult Pitru Dev. Your parents may protest. This is between you and the ancestors now.

* These remedies are satirical and scientifically non-binding. Your actual carbon footprint requires less theatrical and more structural intervention.
