

How does your childhood compare to the climate of today?

Raipur bucked the trend.

An average May now runs 2.5°C cooler than during 1996–2000.

Your climate trail

The air got warmer year by year.

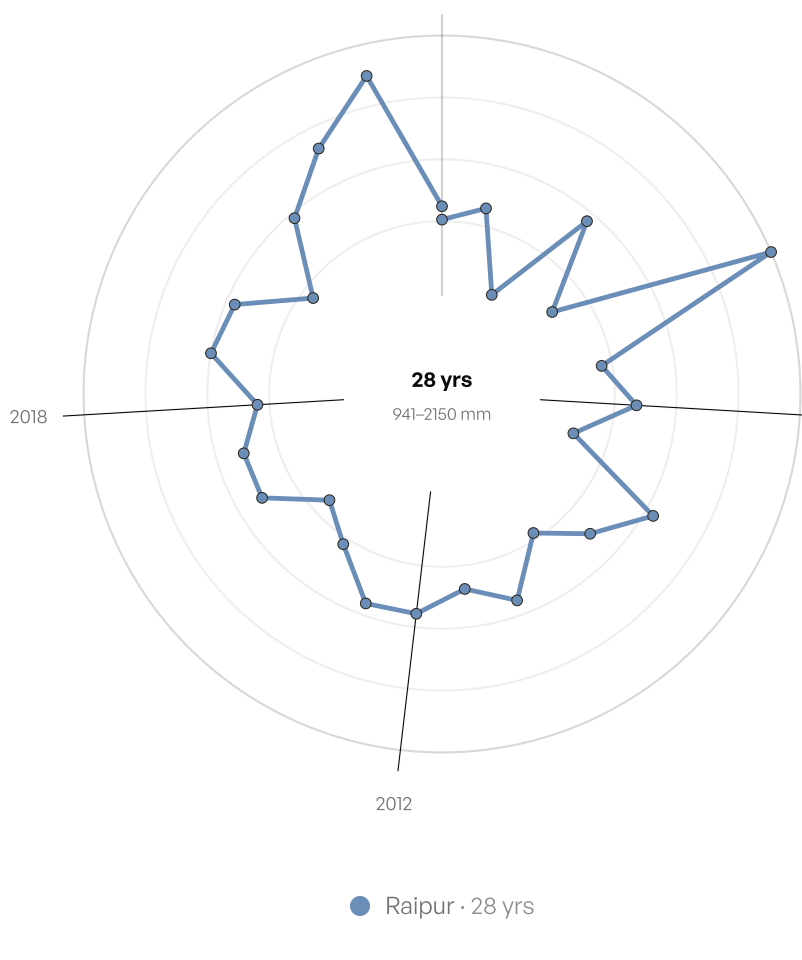

Across 28 years in Raipur, annual mean temperature rose 0.7°C from 1998 to 2025 — your warmest year so far was 2009.

Your orbit

As prescribed by your climate pandit

Your *upaay*.

Every kundli comes with remedies. These have been computed from your personal climate data and endorsed by the relevant deities.

2 VISHWAKARMA

The problem: Your per-capita share of India's CO₂ since you were born: ~36 tonnes.

To offset this, you would need to forgo 5.1M AI queries — or stop using AI entirely for 1,409 years. This prescription is self-aware. We recommend beginning immediately. The deity of technology has already noted the irony.

3 VARUNA DEV

The problem: Sea levels rose 3mm since you were born.

Drink 1 fewer glass of water per week. It will not help, but the gesture is spiritually significant. Additionally, place 1 ice cube in the ocean annually. Do this at dawn. Do not explain yourself to bystanders.

4 ARANYANI

The problem: You have survived 5 of the hottest years on record since 1940.

Perform Vriksha Vivah with 2 trees. This classical practice—adapted here for climate dosh—requires formal betrothal to 2 living trees. Budget approximately ₹8,400 for the ceremonies. The trees cannot object. They also cannot water themselves. This is now your responsibility.
