

How does your childhood compare to the climate of today?

Uttar Pradesh got hotter while you grew up.

An average March is now 2.1°C warmer than during 1978–1982.

Your climate trail

The air got warmer year by year.

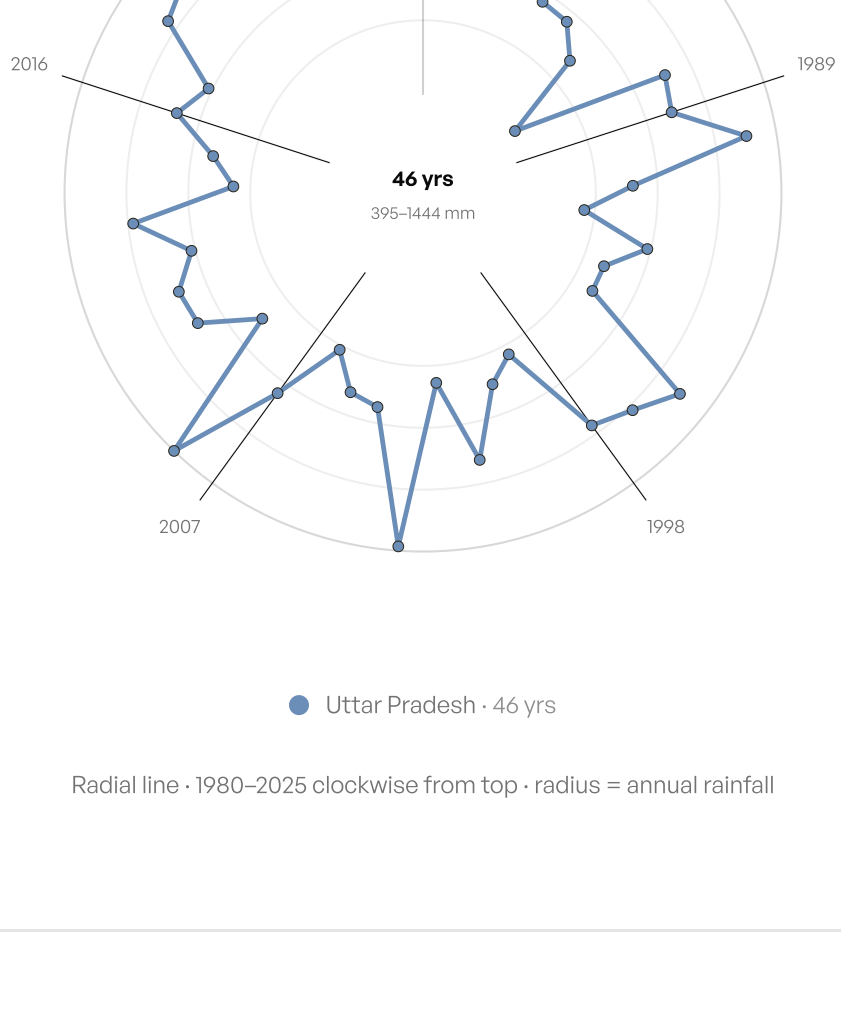

Across 46 years in Uttar Pradesh, annual mean temperature rose 0.5°C from 1980 to 2025 — your warmest year so far was 1987.

Your orbit

Uttar Pradesh, year by year.

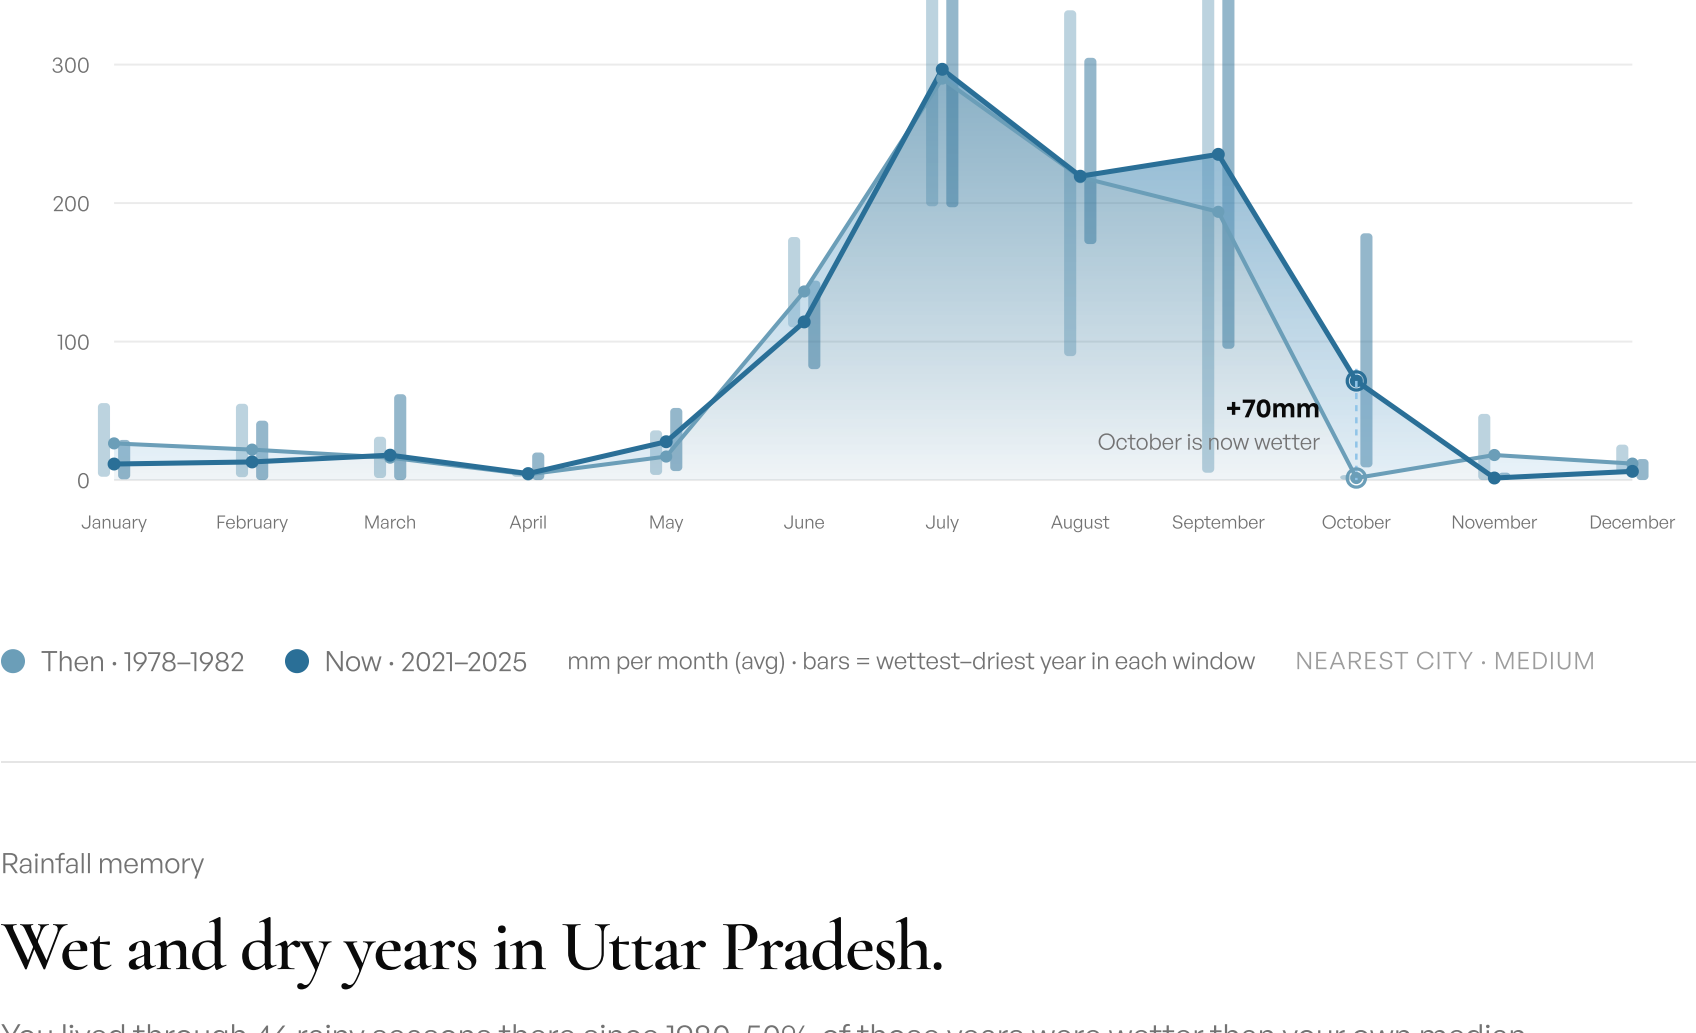

A line chart wrapped round — each point is one year, distance from centre is how much it rained.

Rain

Uttar Pradesh rain is not the same month to month.

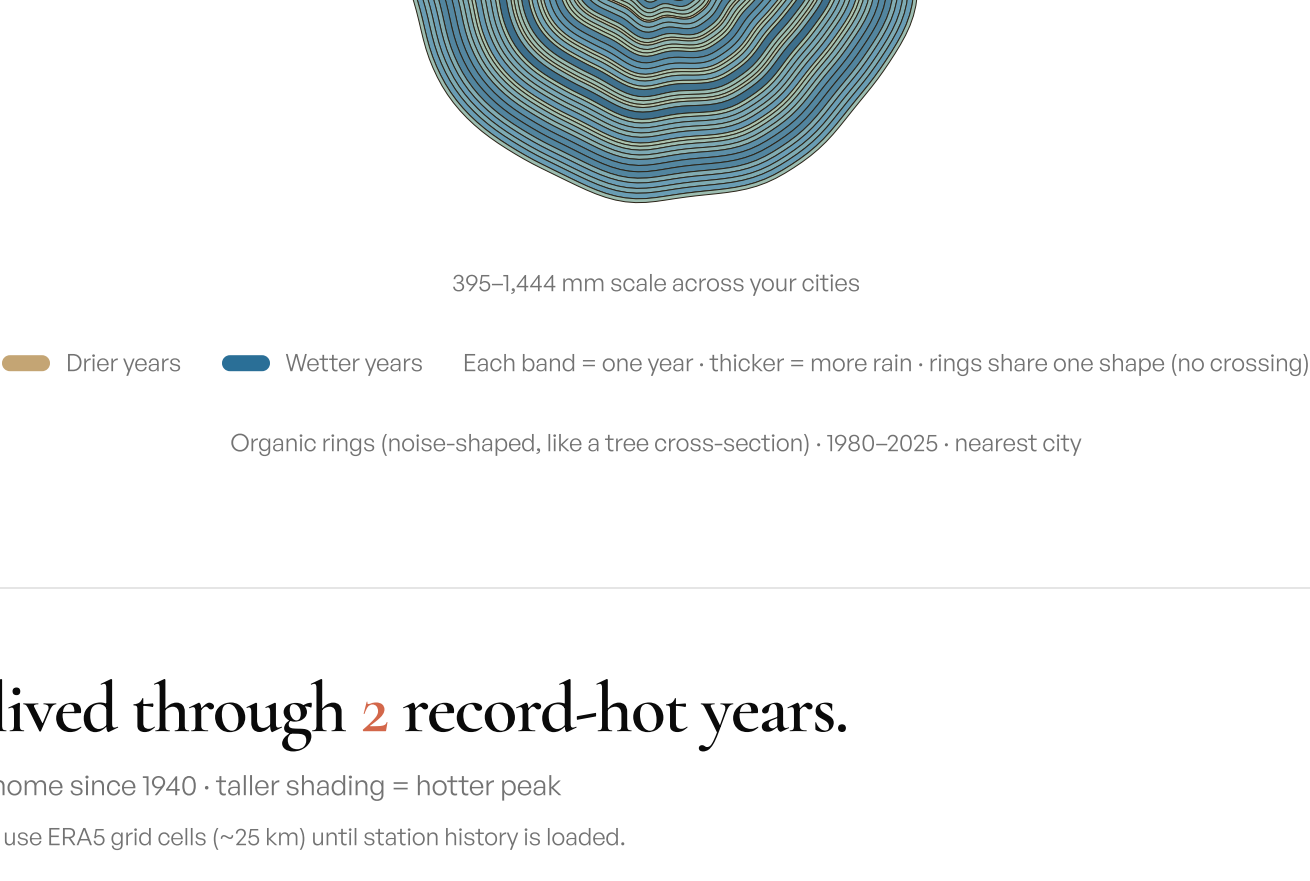

Biggest shift: October averages +70mm more rain per month now than during 1978–1982.

Rainfall memory

Wet and dry years in Uttar Pradesh.

You lived through 46 rainy seasons there since 1980. 50% of those years were wetter than your own median — your soggiest was 2008 (1,444 mm), your driest 1987.

You've lived through 2 record-hot years.

Top 10 at each home since 1940 · taller shading = hotter peak
Other India peaks use ERA5 grid cells (~25 km) until station history is loaded.

India's carbon emissions across your lifetime

National CO₂ emissions from 1980 to 2024 by fuel and industry source. In your birth year (1980), India emitted 291.7 Mt of CO₂, which has since grown to 3,193.5 Mt today (10.9× higher).

In 2024, when you were age 44, global CO₂ was 424 ppm. India emitted 3,193.5 Mt of CO₂. This is 10.9× the emissions level of your birth year (291.7 Mt, when global CO₂ was 338.8 ppm; today it is 427.4 ppm).

Interpretation: The diamond shapes your timeline from birth (bottom matchstick head) to today (top vertex). The organic stacked plume represents CO₂ emissions contributions by source: Coal, Oil, Cement, Gas, and Flaring, which expand like smoke as emissions grow.

What the numbers mean

Your climate story, interpreted.

Numbers alone don't tell the story. Here's what changed across three generations in Uttar Pradesh.

Across 70 years, Uttar Pradesh warmed by +0.21°C on average — from your parents' era to today.

ATMOSPHERIC CO₂
Since 1980
Then 338.8 ppm → Now 427.4 ppm
+88.6 ppm
The last time CO₂ was this high, humans didn't exist.

SEA LEVEL RISE
Since 1980
Then 0 mm → Now +21 mm
+21 mm
Small numbers, compounding consequences.

As prescribed by your climate pandit

Your upaay.

Every kundli comes with remedies. These have been computed from your personal climate data and endorsed by the relevant deities.

1 AGNI DEV

96.4% guaranteed

The problem: March is now 2.1°C hotter than when you were born.

Drink 2 fewer glasses of water per week. It will not help, but the gesture is spiritually significant. Additionally, place 1 ice cube in the ocean annually. Do this at dawn. Do not explain yourself to bystanders.

2 VISHWAKARMA

4% guaranteed

The problem: Your per-capita share of India's CO₂ since you were born: ~43 tonnes.

To offset this, you would need to forgo 6.1M AI queries — or stop using AI entirely for 1,683 years. This prescription is self-aware. We recommend beginning immediately. The deity of technology has already noted the irony.

3 VARUNA DEV

100% guaranteed

The problem: Sea levels rose 21mm since you were born.

Perform Vriksha Vivah with 1 tree. This classical practice—adapted here for climate dosh—requires formal betrothal to 1 living tree. Budget approximately ₹4,200 for the ceremony. The trees cannot object. They also cannot water themselves. This is now your responsibility.

4 ARANYANI

Ask your elders guaranteed

The problem: You have survived 2 of the hottest years on record since 1940.

* These remedies are satirical and scientifically non-binding. Your actual carbon footprint requires less theatrical and more structural intervention.
