The problem: Your per-capita share of India's CO₂ since you were born: ~32 tonnes.

To offset this, you would need to forgo 4.6M AI queries — or stop using AI entirely for 1,252 years. This prescription is self-aware. We recommend beginning immediately. The deity of technology has already noted the irony.

The problem: You have survived 4 of the hottest years on record since 1940.

Perform Vriksha Vivah with 2 trees. This classical practice—adapted here for climate dosh—requires formal betrothal to 2 living trees. Budget approximately ₹8,400 for the ceremony. The trees cannot object. They also cannot water themselves. This is now your responsibility.
